

Chapter 2 - Frequency Distributions and Graphs

EXERCISE SET 2-1

1. Frequency distributions are used to organize data in a meaningful way, to determine the shape of the distribution, to facilitate computational procedures for statistics, to make it easier to draw charts and graphs, and to make comparisons among different sets of data.

2. Categorical distributions are used with nominal or ordinal data, ungrouped distributions are used with data having a small range, and grouped distributions are used when the range of the data is large.

3. Five to twenty classes. Width should be an odd number so that the midpoint will have the same place value as the data.

4. An open-ended frequency distribution has either a first class with no lower limit or a last class with no upper limit. They are necessary to accommodate all the data.

5.

Boundaries: 57.5 – 62.5

Midpoint: 60

Width: 5

6.

Boundaries: 124.5 – 131.5

Midpoint: 128

The Pre-Kernel as a Tractable Solution for Cooperative Games Holger Ingmar Meinhardt, 2013-10-23 This present book provides an alternative approach to study the pre kernel solution of transferable utility games based on a generalized conjugation theory from convex analysis Although the pre kernel solution possesses an appealing axiomatic foundation that lets one consider this solution concept as a standard of fairness the pre kernel and its related solutions are regarded as obscure and too technically complex to be treated as a real alternative to the Shapley value Comprehensive and efficient computability is widely regarded as a desirable feature to qualify a solution concept apart from its axiomatic foundation as a standard of fairness We review and then improve an approach to compute the pre kernel of a cooperative game by the indirect function The indirect function is known as the Fenchel Moreau conjugation of the characteristic function Extending the approach with the indirect function we are able to characterize the pre kernel of the grand coalition simply by the solution sets of a family of quadratic objective functions
