Finance Week ,2001-03 , **McGregor's who Owns Whom in South Africa** ,1999 The Evolution of the South African System of Innovation since 1916 Mario Scerri,2009-05-27 In this book Mario Scerri provides the reader with a novel and sweeping rendition of South Africa s economic history from the early part of the twentieth century to the present He applies a broad innovation systems approach to this history spanning the period from 1916 which saw the drafting of South Africa s first Science and Technology plan to the first fourteen years of the post apartheid period The introduction of the book lays out the scope of the work and its focus on the identification of continuities and ruptures in the economic history of South Africa The first part of the book deals with the theoretical foundations of the approach The first chapter in this section looks at the emergence of evolutionary economics and innovation systems theory as the basis for the main countervailing argument against the neoclassical neoliberal orthodoxy In the course of this chapter the foundation is laid for the development of an alternative general theory of economics The second chapter covers the main debates on the economic history of South Africa and looks at the several varieties of the liberal and Marxist renditions of this history The theoretical section lays the foundation for the history that is covered in the four chapters which follow These cover three broad periods since 1916 The first runs up to 1948 with the election victory of the National Party The second covers the apartheid period and the last follows with an account of the post apartheid political economy An endnote provides the basis for the analysis of what may possibly be the emergence of a fourth main period in the evolution of the South African system of innovation The Evolution of the South African System of Innovation since 1916 opens up a novel engagement with the complex phenomenon of apartheid its genealogy and its aftermath It will appeal to economists and economic historians who are interested in the economy of South Africa It will be of particular interest to evolutionary economists who use the systems of innovation approach as an alternative to mainstream neoclassical economics in the analysis of dynamic economic systems For this particular audience this book will provide a welcome addition to the growing body of literature in this area especially given the novelty of its historical approach **Enforcing Competition Rules in South Africa** David Lewis,2013-01-01 This fascinating book describes and analyses the development of competition law in South Africa promoting a deeper understanding of the development of this foundational economic law within its specific national social and economic context Enforcing Competition Rules in South Africa is a clear and insightful account of the establishment and first decade of one of the most successful competition law institutions to have mushroomed over the past 15 years David Lewis believes that while there is much to learn from international scholarship and jurisprudence and from participation in the various multinational initiatives in this field competition law and its institutions have to be understood within their national economic and social contexts Drawing strongly on case law and enforcement experiences this book will appeal to academics researchers and practitioners of competition law and economics The Challenges of Privatization Bernardo Bortolotti,Domenico Siniscalco,2004-03-11 From 1997 to 2001 more than 4 000 privatization operations have been carried out in more than 100 countries bringing in

government revenues of over 1 362 billion dollars The phenomenon which grew exponentially at the end of the 1990s and then abruptly slowed down had dramatic consequences on the performance of state owned enterprises and a significant impact on industrialized countries as well as emerging and less developed economies Yet there have been surprisingly few attempts to provide a systematic empirical account of the privatization process at the worldwide level Why do governments privatize Why do some countries accomplish large scale privatization programmes and others never privatize at all Is privatization a trend or a cycle Furthermore how do governments privatize Do governments really transfer ownership and control of state owned enterprises or does private ownership tend to coexist with public control This book provides some answers to these important questions trying to test research hypotheses set forth by the recent economic theory of privatization Comprehensive cross country empirical analyses carried out over a period of more than twenty years are used in the book to show that privatization has taken place all over the world sometimes spontaneously more often under the pressure of economic and budgetary constraints Several of the goals of the privatization have been met but despite proclamations and programmes only a small minority of countries has carried out a genuine privatization process completely transferring ownership of state owned enterprises to the private sector A lack of political will is to some extent at the root of this reluctance However this reluctance can be traced back partly to structural factors that would make an orderly privatization difficult such as the absence of developed capital markets appropriate regulation and suitable institutions

Kenya National Assembly Official Record (Hansard) ,2005-08-04 The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya **Project Failure** Michael Mentis,2024-04-17 This book supposes you want to plan and complete a project Why might you fail What can you do to reduce the chances of failure This book looks at where projects fail the causes and what measures can limit failure Failures and the reasons for them are examined Areas discussed include unclear objectives evaluating alternatives the planning fallacy misperception of the nature of risk devising risk appetite overly narrow risk assessment and identification undervaluing natural capital lack of stakeholder engagement unclear responsibility assignment and conflicting interests Machiavellianism can make things happen when they shouldn't or obstruct them when they should happen The book concludes with a concise one page risk management guide As well as pulling together and summarising relevant literature sources the author draws on more than fifty years experience in small and large scale project management including water supply biodiversity and environmental management and work with the extractive industries **The Boardroom** Peter Verhezen,Tanri Abeng,2022-08-01 Most books about corporate governance are written for a Western audience The Boardroom however takes a different approach to leadership development by emphasizing the unique socio cultural and judicial features as well as idiosyncratic board structures in Asia particularly in an Indonesian context The principles of good corporate governance are accepted across borders but the implementation and

translation of transparency fairness accountability and responsibility can differ quite distinctly from one country to another Amidst global competitive turbulence socio economic volatility and geopolitical uncertainty The Boardroom analyses how Asian boardroom leaders steer organizations and how boards can be more effective Boardmembers appointed and entrusted by their owners are guardians with a fiduciary duty to safeguard an organization and prepare it for a viable and sustainable future Business managers investors academics students and those interested in doing business in Asia will benefit from The Boardroom s practical insights and recommendations to improve corporate governance and strengthen competitive advantage The Boardroom a book written by my predecessor Dr Tanri Abeng and his co author Prof Dr Peter Verhezen who both combine practical experience and academic in depth research gives a good overview of what can and should be expected from a board The authors describe the generic accepted governance principles but rightfully claim the need to translate them into specific rules and regulations that make sense for Indonesian and other Asian companies Erick Thohir The Minister of State Owned Enterprises of the Republic of Indonesia Understanding the dynamics of successful organizations is like being on a quest It probably never ends Organizations are open and social systems that cannot be managed or governed using simple theories and recipes Hence this book invites you to start your own leadership journey and become more mindful of your role in the functioning of a company Prof Dr Koen Vandenbempt Dean of the Faculty of Business Economics at the University of Antwerp Belgium Spiritual Economies Daromir Rudnyckyj,2011-08-15 In Europe and North America Muslims are often represented in conflict with modernity but what could be more modern than motivational programs that represent Islamic practice as conducive to business success and personal growth Daromir Rudnyckyj s innovative and surprising book challenges widespread assumptions about contemporary Islam by showing how moderate Muslims in Southeast Asia are reinterpreting Islam not to reject modernity but to create a spiritual economy consisting of practices conducive to globalization Drawing on more than two years of research in Indonesia most of which took place at state owned Krakatau Steel Rudnyckyj shows how self styled spiritual reformers seek to enhance the Islamic piety of workers across Southeast Asia and beyond Deploying vivid description and a keen ethnographic sensibility Rudnyckyj depicts a program called Emotional and Spiritual Quotient ESQ training that reconfigures Islamic practice and history to make the religion compatible with principles for corporate success found in Euro American management texts self help manuals and life coaching sessions The prophet Muhammad is represented as a model for a corporate CEO and the five pillars of Islam as directives for self discipline personal responsibility and achieving win win solutions Spiritual Economies reveals how capitalism and religion are converging in Indonesia and other parts of the developing and developed world Rudnyckyj offers an alternative to the commonly held view that religious practice serves as a refuge from or means of resistance against modernization and neoliberalism Moreover his innovative approach charts new avenues for future research on globalization religion and the predicaments of modern life *Behold the Turtle* Bonang Mohale,2021-11-05

Behold the turtle he only makes progress when his neck is stuck out This proverb included in Bonang Mohale s best selling first book *Lift As You Rise* sets the tone for his second book which includes fresh insights and wisdom from one of South Africa s best loved leaders As a change agent defender of democracy and a social justice activist Bonang continues to stick his own neck out addressing issues of key societal importance Following on from the success of his first book his new book *Behold the Turtle Thoughts on Ethically Principled Leadership* expands on issues of leadership resilience ethics and social justice sounding a call for change Never one to avoid tough issues Bonang tackles the role that business institutions of higher learning and other organisations need to play in creating South Africa s future as well as the risk and responsibility required of each of us as individuals The book incorporates insights from Bonang s respected colleagues such as Mteto Nyati Adrian Gore Andile Nomlala Vukani Mngxati and Nicola Kleyn who add personal lessons and anecdotes creating a pool of wisdom from which readers can drink deeply Citing Alexander the Great Bonang says I am not afraid of an army of lions led by a sheep I am afraid of an army of sheep led by a lion This book focuses on ethical leadership and embracing our own agency A MUST READ Professor Bonang F Mohale is the Chancellor of the University of the Free State Professor of Practice at the Johannesburg Business School JBS College of Business and Economics Chairman of both Bidvest Group Limited and SBV Services President of Business Unity South Africa former CEO of Business Leadership South Africa and past president of the Black Management Forum

Communication and Democratic Reform in South Africa Robert B. Horwitz, 2001-04-09 The book examines the reform of the communication sector in South Africa as a detailed and extended case study in political transformation the transition from apartheid to democracy The reform of broadcasting telecommunications the state information agency and the print press from apartheid aligned apparatuses to accountable democratic institutions took place via a complex political process in which civil society activism embodying a post social democratic ideal largely won out over the powerful forces of formal market capitalism and older models of state control In the cautious acceptance of the market the civil society organizations sought to use the dynamism of the market while thwarting its inevitable inequities Forged in the crucible of a difficult transition to democracy communication reform in South Africa was navigated between the National Party s embrace of the market and the African National Congress leadership s default statist orientation
