Unisa Natural Science May June 2011 Exam

J Ma

Unisa Natural Science May June 2011 Exam:

Social Constructions of Water Quality in South Africa Suvania Naidoo, 2022-05-04 This book details how the water quality of the Blesbokspruit River in Gauteng South Africa was socially constructed by stakeholders and key individuals in the context of acid mine drainage AMD and its treatment Social constructionism is used as the framing for this research to explain how water is intrinsically social Findings presented here show that stakeholders are aware that the changes in the physicality of the Blesbokspruit resulted from human interventions and varied uses of the water over the years Such knowledge among factors such as the historical context of mining current coal mining flows and volumes of water technology used and processes followed information and communication and vested interests influence social constructions of the water quality What counts as the truth about water varies depending on the individual s perspective their purpose and their individual interests Further how one defines water quality influences what treatment processes are preferred in order to improve water quality The book explains why for example a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government s silo approach The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit The case presented in this book offers insights and recommendations for policymakers working in water governance including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government

Evolution and Human Behaviour John Cartwright, 2017-09-16 Our experience of the world is driven by processes common to all animals growth survival reproduction and death Evolution and Human Behaviour explores the complexities of the human experience through the lens of Darwinism drawing on a long and vibrant tradition of different theories and interpretations This textbook offers a compelling synthesis of key concepts addressing human thought feeling and behaviour in fundamental evolutionary terms This is a essential text for undergraduate students taking courses in psychology human biology ethology anthropology and human behavioural ecology providing an insightful and comprehensive introduction for anyone who wishes to understand how human behaviour has evolved new_to_this_edition Additional chapters on health and disease homosexuality the nature of adaptations and life history theory Includes brand new material on epigenetics patterns of crime error management theory moral foundations theory religion and gene culture co evolution Now accompanied by a companion website offering additional reading material and useful practice questions New controversy boxes in each chapter providing ideas for essay topics and classroom discussion
