The Annotated Malay Archipelago by Alfred Russel Wallace Alfred Russel Wallace,2014-09-29 Wallace's Malay Archipelago is a classic account of the travels of a Victorian naturalist through island Southeast Asia It has been loved by readers ever since its publication in 1869 Despite numerous modern reprints with appreciative introductions this is the first and long overdue annotated edition in English This edition explains updates and corrects the original text with an historical introduction and hundreds of explanatory notes Wallace left hundreds of people places publications and species unidentified He referred to most species only with the scientific name current at the time Whenever available the common names for species have been provided and scientific names updated The content of the book has never been thoroughly analysed and compared against other contemporary sources It turns out that the book contains many errors This includes not just incorrect dates and place names but some of the most remarkable anecdotes for example the dramatic claim that tigers kill on an average a Chinaman every day in Singapore or that a Dutch Governor General committed suicide by leaping from a waterfall on Celebes By correcting the text of the Malay Archipelago against Wallace's letters and notebooks and other contemporary sources and by enriching it with modern identifications this edition reveals Wallace's work as never before
