Leadership Experience and Leadership Performance Fred Edward Fiedler, 1994 This report summarizes the major findings of a 20 year program of research on the role and function of cognitive resources in organizational performance Although there is no generally accepted definition of the term leadership experience is one of the most important factors in selection and promotion decisions In common usage experience most often refers to time in service TIS at an organization a job or occupation e g How long have you been a manager here Other definitions may also refer to diversity richness or relevance of previous jobs However all definitions imply skills knowledge and behavior acquired in the course of time on the job rather than by formal training This report is based on data from over 1 200 leaders and task groups in military and civilian organizations and laboratory settings Most of the studies were part of a larger project on the utilization of cognitive resources that is the leaders intellectual abilities experience and job relevant knowledge and skills Three specific points should be kept in mind in reading this report 1 Our research focuses on leadership experience not individual experience e g conducting an orchestra not playing a violin 2 High or low leadership experience intelligence expertise etc in this report is almost always based on a comparison within a particular sample A platoon sergeant has high or low intelligence in comparison with other platoon sergeants regardless of his or her score on a standardized intelligence test 3 The effective utilization of a cognitive resource e g experience is inferred from the correlation between that resource and the performance of the leader or the group Thus a correlation of 80 between time in service TIS and performance implies that experience contributed strongly to performance 00 implies that experience had no influence and -80 implies that experience was detrimental to performance

The Overlord Effect Michael David Pierce, 2013-04-19 The Overlord Effect is a historically based leadership review that combines the accounts of Veterans of the Normandy Campaign of World War II and presents a conversation about their experiences with the leadership theories that have become part of today's conversation on the subject in the military, academics, and business. The Normandy Invasion was one of the most complex and successful military campaigns in history. The preparation for this event took years of planning and training. It required leaders at every level to demonstrate exemplary leadership in a compressed space and time that called for decisions to be made in an instant for leaders to act with courage and character and for both followers and leaders to accomplish any mission regardless of the personal cost. The Overlord Effect takes the snapshots of the critical experiences of leaders at every level of the Allied Invasion Force and reviews their actions and places them into understandable, thought-provoking insights that will help leaders in any discipline respond better to challenges. The work also presents Dr. Pierce's theory on Emergent Leadership During Crisis (ELDC) and discusses ways that the leaders and professionals of today can use it to help themselves understand their own leadership experience as well as to develop future leaders in the workplace.
