The Making Of A World City London 1991 To 2021:

The Making of a World City Greg Clark, 2014-10-16 After two decades of evolution and transformation London had become one of the most open and cosmopolitan cities in the world The success of the 2012 Olympics set a high water mark in the visible success of the city while its influence and soft power increased in the global systems of trade capital culture knowledge and communications The Making of a World City London 1991 2021 sets out in clear detail both the catalysts that have enabled London to succeed and also the qualities and underlying values that are at play London s openness and self confidence its inventiveness influence and its entrepreneurial zeal London s organic unplanned incremental character without a ruling design code or guiding master plan proves to be more flexible than any planned city can be Cities are high on national and regional agendas as we all try to understand the impact of global urbanisation and the re urbanisation of the developed world If we can explain London s successes and her remaining challenges we can unlock a better understanding of how cities succeed

The Desecularisation of the City David Goodhew, Anthony-Paul Cooper, 2018-09-21 Major cities have long been seen as centres of secularisation However the number of congregations in London grew by 50% between 1979 and the present London s churches have been characterised more by growth than by decline in the decades since 1980 The Desecularisation of the City provides the first academic survey of churches in London over recent decades linking them to similar developments in other major cities across the West Produced by a large team of scholars from a range of disciplines this volume offers a striking and original portrait of congregational life in London since 1980 Seventeen chapters explore the diverse localities ethnicities and denominations that make up the church in contemporary London The vitality of London s churches in the last four decades shows that secularisation is far from inevitable in the cities of the future This study necessitates a significant reassessment of the dominant academic portrayal of Christianity in Britain and the West which has mostly depicted cities as secular spaces within a secularising culture It will be of great interest to scholars working across a wide range of disciplines including history sociology religious studies and theology

Migration and the European City Christoph Cornelißen, Beat Kümin, Massimo Rospoche, 2022-03-07 Looking back over the centuries migration has always formed an important part of human existence Spatial mobility emerges as a key driver of urban evolution characterized by situation specific combinations of opportunities restrictions and fears This collection of essays investigates interactions between European cities and migration between the early modern period and the present Building on conceptual approaches from history sociology and cultural studies twelve contributions focus on policies representations and the impact on local communities more generally Combining case studies and theoretical reflections the volume s contributions engage with a variety of topics and disciplinary perspectives yet also with several common themes One revolves around problems of definition both in terms of demarcating cities from their surroundings and of distinguishing migration in a narrower sense from other forms of short and long distance mobility Further shared concerns include the integration of multiple analytical

scales contextual factors and diachronic variables such as urbanization industrialization and the digital revolution

Migrant City Panikos Panayi, 2020-04-07 The first history of London to show how immigrants have built shaped and made a great success of the capital city London is now a global financial and multicultural hub in which over three hundred languages are spoken But the history of London has always been a history of immigration Panikos Panayi explores the rich and vibrant story of London from its founding two millennia ago by Roman invaders to Jewish and German immigrants in the Victorian period to the Windrush generation invited from Caribbean countries in the twentieth century Panayi shows how migration has been fundamental to London's economic social political and cultural development Migrant City sheds light on the various ways in which newcomers have shaped London life acting as cheap labour contributing to the success of its financial sector its curry houses and its football clubs London's economy has long been driven by migrants from earlier continental financiers and more recent European Union citizens Without immigration fueled by globalization Panayi argues London would not have become the world city it is today

The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes

employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

Destination London Andrew Smith, Anne Graham, 2019-05-21 London is one of the world s most popular destinations and visitors contribute approximately 14.9 billion of expenditure to the city every year Its tourism and events sectors are growing and over the last few years London has received more visitors than ever before However detailed accounts of the city s visitor economy are conspicuously absent

This book analyses how the capital is developing as a destination through the expansion of tourism and events into new urban spaces. The book outlines how parts of London not previously regarded as tourist territory are now subject to the visitor gaze with tourism spreading beyond established central zones into peripheral suburban and residential areas in part propelled by a big rise in peer to peer accommodation use. Simultaneously London's airports and sports stadiums and their surrounds are becoming destinations in their own right. New vantage points have been created allowing tourists to explore the city from above at night time or through tours given by the homeless via the opening up of the River Thames or through the transformation of local parks into eventscares. The book explores these trends and shows how urban destinations expand. In doing so it enhances our understanding of London and highlights the growing significance of tourism and events in global cities.

Global Cities Greg Clark, 2016-11-29 Why have some cities become great global urban centers and what cities will be future leaders. From Athens and Rome in ancient times to New York and Singapore today a handful of cities have stood out as centers of global economic military or political power. In the twenty first century the number of truly global cities is greater than ever before reflecting the globalization of both economic and political power. In *Global Cities A Short History* Greg Clark an internationally renowned British urbanist examines the enduring forces such as trade migration war and technology that have enabled some cities to emerge from the pack into global leadership. Much more than an historical review Clark's book looks to the future examining the trends that are transforming cities around the world as well as the new challenges all global cities increasingly will face. Which cities will be the global leaders of tomorrow. What are the common issues and opportunities they will face. What kinds of leadership can make these cities competitive and resilient. Clark offers answers to these and similar questions in a book that will be of interest to anyone who lives in or is affected by the world's great urban areas.

London: Mobility City Greg Clark, Tim Moonen, Jake Nunley, 2018-11-16 Despite the uncertainties of Brexit London continues to be rated as a leading location in Europe and the world for business knowledge and talent. But 30 years ago when London had no citywide government a transport system in crisis and no successful track record of continuous large scale upgrades to the urban fabric this scenario would have seemed highly unlikely. In this essay we examine how London's unpromising 1980s gave rise to three decades of reinvestment and we explain how the European Investment Bank played an essential catalytic role in successive cycles of London's evolution from an under governed depopulating national capital into a diverse global centre benefiting from integrated urban systems management.

World Cities and Nation States Greg Clark, Tim Moonen, 2016-11-11 *World Cities and Nation States* takes a global perspective to show how national governments and states provinces regions continue to play a decisive and often positive partnership role with world cities. The 16 chapter book comprised of two introductory chapters 12 central chapters that draw on case studies and two summary chapters draws on over 40 interviews with national ministers city government officials business leaders and expert academics.
