Area, Perimeter, & Volume

Study Guide

MEASUREMENT & GEOMETRY

Area, Perimeter, and Volume

Perimeter

Perimeter is the path or distance around the plane figure.

It is a measure of length, like you could the circumference, inches, and feet to measure perimeter.

Perimeter is used in many real-life situations where you need to measure the boundary or outline of an object. Here are some examples:

Fencing a garden, measuring a yard, measuring a room, measuring a track, measuring a path.

Area

Area is a measure of space within a plane figure.

Area is measured by the number of square units needed to cover a surface or a plane figure.

Units are written as square units or sq.

Area is used in many real-life situations where you need to determine the amount of space a surface covers. Here are some examples:

Measuring a wall, measuring a rug, measuring the floor, measuring a garden, measuring a pool.

Area of a Right Triangle

A right triangle is a triangle with one right angle.

A right triangle has a base and a height that is used to determine the area of the triangle.

Finding Area of a Right Triangle

To find the area of a triangle, use the formula:

$$A = \frac{1}{2} \times b \times h$$

Example 1: A right triangle with a base of 6 inches and a height of 4 inches.

$$A = \frac{1}{2} \times 6 \times 4$$

$$A = \frac{1}{2} \times 24$$

$$A = 12 \text{ square inches}$$

Example 2: A right triangle with a base of 8 inches and a height of 3 inches.

$$A = \frac{1}{2} \times 8 \times 3$$

$$A = \frac{1}{2} \times 24$$

$$A = 12 \text{ square inches}$$

Example 3: A right triangle with a base of 10 inches and a height of 5 inches.

$$A = \frac{1}{2} \times 10 \times 5$$

$$A = \frac{1}{2} \times 50$$

$$A = 25 \text{ square inches}$$

Why do we use the area formula, but multiply it by half?

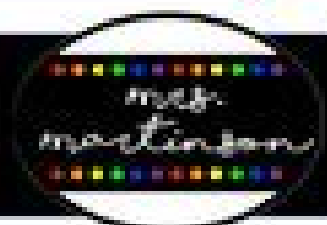

When a rectangle can be divided in half to create two congruent right triangles.

The area of the rectangle is $8 \times 7 = 56 \text{ sq. in.}$

The area of a right triangle is **HALF** the area of the rectangle because we are only taking about **HALF** of the space.

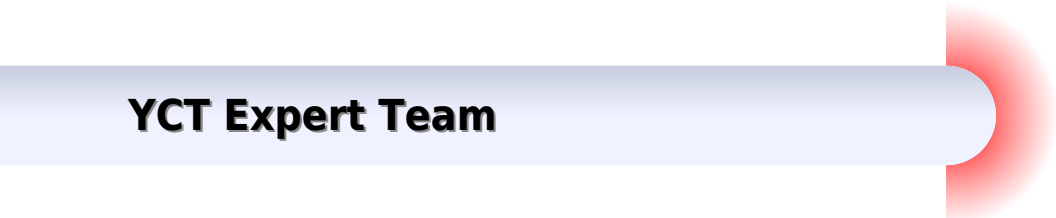

$$A = \frac{1}{2} \times 56 \text{ sq. in.} = 28 \text{ sq. in.}$$

Aligns to VA SOL 5.MG.2
