

Zoology Exam 2 Study Guide

*****Note:** This review guide lists topics that I consider important for the exam, along with hints/reminders about what I expect you to have learned from our classes. It is NOT an exhaustive list of all material covered in class, and occasional questions on the final exam may cover material outside the scope of this review sheet.*

Exam Reminders & Advice

- The exam will take place during class on Monday, October 30.
- **Your *must* attend class in person to take the exam.**
- The exam will be mixed format. It may include multiple-choice, short-answer, and matching questions.
- You will have 50 minutes to complete roughly 25 questions.
- To prepare yourself for the exam:
 - o Study for multiple days and in multiple sessions.
 - o Review class notes alongside this study guide.
 - o Read/review the sections of the textbook mentioned below
 - o Quiz yourself on the topics listed here. Force yourself to describe (out loud to yourself) the various concepts without looking at your notes. If you can't do a good job, look back at your notes, think, and then try again (until you succeed!)
 - o Remember to spend time focusing on concepts and ideas and seeing the big picture. DON'T simply try to memorize everything!
 - o When they are posted to Blackboard, review the example questions given to the class during the review session

Cumulative Portion of Exam 2

- ***You may recall that our exams are cumulative. Please review and know the following:***
- Know that all life (current and former, extinct species) can be placed on a "tree of life" with three domains (Bacteria, Archaea, and Eukaryota) and what this tree represents (relatedness of all life and evolution from a common ancestor)
- Know the 8 taxonomic ranks and their relative order (domain, kingdom, phylum, etc.)
 - o Know that species is typically referenced by its scientific name, which is binomial (two-part): Genus species
- Know the name of the domain and kingdom to which animals belong
- Know the definition of microevolution (smallest unit of evolution) as discussed in class.
- Know the Biological Species Concept.
- What are the 5 forces of evolutionary change (AKA the "five fingers of evolution")?
- Principle of Parsimony – what is it and how is it applied to phylogenetic trees?
 - o Be able to tell which tree is most parsimonious.
- Zoology Crash Course Video – shown in class on April 15 or 13, depending on section
