Learning from the Past, Present, and Future to Drive Profits to New Levels Bob Sproull, 2023-11-23 The content of this book is centered around three seemingly diverse themes The first theme is why it is so important for companies to learn from the past the present and the future The author covers some of the key learnings from the distant and current past and how these learnings changed the course for many companies He discusses new learnings that have been developed in our current state and will continue to be brought forward He provides a look into the future just to make sure companies understand that they should always be looking for better ways to function The second theme is centered around problem solving problem prevention and decision making That is how to successfully define problems that already exist in your current reality how to prevent problems from occurring in the future and how to make much more effective decisions Problems have plagued many companies for many years and knowing how to follow a structured approach to solve them should prove to be very useful And perhaps even more important than solving problems is how companies can go about preventing the problems from occurring in the first place Think about how your company might look if the plethora of problems to solve didn't exist And with current or potential problems many decisions must be made The final theme in this book is how to successfully implement the Theory of Constraints and then combine Lean Manufacturing Six Sigma and the Theory of Constraints The Theory of Constraints should be considered the missing link in most improvement initiatives The author presents in detail why combining the Theory of Constraints with Lean and Six Sigma and all of the associated improvement tools and techniques will take your company to new levels of profitability He introduces two new roadmaps One roadmap is on how to implement the Theory of Constraints while the other new roadmap is how to implement my Ultimate Improvement Cycle *Factory Physics* Wallace
