Virtual River Discharge Answers Key:

The Online Tutor's Toolkit Molly Bolding, 2022-10-12 This book contains everything you need to know to get started as an online tutor. It covers the essentials of tutoring: choosing your tech and software, managing homework, and getting set up alongside detailed guidance focusing on each level of tuition. With techniques developed through research and first-hand experience, the author explains exactly how to turn existing subject knowledge into effective tutoring for students of all ages in a variety of subjects. Divided into two parts, the first answers the logistical questions facing every new tutor, such as what equipment do I need? Where can I apply? How much should I charge? The second half focuses on how to tutor different age groups effectively and subject-specific areas including English, Maths, and Science, as well as the author's tried and tested 5-step process for choosing a subject, assessing a student, and planning their first lessons. There is also information on how to support students writing personal statements and applying to university, as well as teaching English as a Second Language. Alongside tailored up-to-date information on available software, hardware, exam specifications, and the online tutoring marketplace, the book contains a 10-week timetable of adaptable lesson plans so new tutors can get started immediately. Finally, there are two additional downloadable chapters which expand on less common subjects and another which includes a digital download of every resource from the book. With suggestions for resources, homework, and timings to support you at every stage, this is an essential read for anyone wanting to succeed as an online tutor. [Labyrinth and Piano Key Weirs III](#)

Sébastien Erpicum, Frédéric Laugier, Michel Ho Ta Khanh, Michael Pfister, 2017-04-11 Since the first implementation by Electricité de France on the Goulours dam, France, in 2006, the Piano Key Weir has become a more and more applied solution to increase the discharge capacity of existing spillways. In parallel, several new large dam projects have been built with such a flood control structure, usually in combination with gates. Today, more than 25 Piano Key Weirs are in operation or under construction all over the world. More than 15 years of research and development have enabled detailed investigations of the hydraulic and structural behaviour of the Piano Key Weir complex structure and have provided more and more accurate design equations. Following the proceedings of the first two workshops held in Liege, Belgium, 2011, and Paris, France, 2013, *Labyrinth and Piano Key Weirs III* collects the contributions presented by people with varied backgrounds, from researchers to practitioners, at the 3rd International Workshop on Labyrinth and Piano Key Weirs (PKW) 2017, 22-24 February 2017, Qui Nhon, Vietnam. The papers reviewed and accepted by an International Scientific Committee summarize the current state of the art on Piano Key Weirs from a theoretical to a practical point of view and present most of the main projects in operation or under construction. *Labyrinth and Piano Key Weirs III* is thus a reference for students, practitioners, and researchers interested in Dams Engineering.
