Top Medical Journals Impact Factor:

The Savvy Academic Seth J. Schwartz, 2022 This book uncovers the secrets of academic publishing in the health and social sciences at all stages of the process Drawing on a wealth of examples from his own experience mentoring and publishing 300 articles Dr Schwartz engage professionals and students alike to demystify the publication process covering basics such as topic selection data analysis writing preparation drafting and editing and manuscript submissions The book advances into innovative topics such as Open Access publishing recruiting and collaborating with coauthors the peer review process non empirical papers rejected manuscripts and book and chapter publishing The Savvy Academic is the ultimate tool for students and seasoned professionals in the health and social sciences who aspire to boost their academic publishing expertise Book jacket

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrops rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Medical Journals and Medical Knowledge William F. Bynum, Stephen Lock, Roy Porter, 2019-01-15 Originally published in 1992 Medical Journals and Medical Knowledge examines both broad developments in print and media and the practice of particular journals such as the British Medical Journal The book is the first study to address these questions and to examine the impact of regular news on the making of the medical community The book considers the rise of the medical press and looks at how it recorded and described principal developments and so promoted medical science and enhanced medical consciousness This book was a seminal work when first published and was one of the first to consider the importance of the roots of medical journalism editorial practices and the ways in which the medical journalism altered the world of medicine

Strategic Scientific and Medical Writing Pieter H. Joubert, Silvia M. Rogers, 2015-11-27 A document may be based on accurate medical and scientific information

follow guidelines precisely and be well written in clear and correct language but may still fail to achieve its objectives The strategic approach described in this book will help you to turn good medical and scientific writing into successful writing It describes clearly and concisely how to identify the target audience and the desired outcome and how to construct key messages for a wide spectrum of documents Irrespective of your level of expertise and your seniority in the pharmaceutical regulatory or academic environment this book is an essential addition to your supporting library The authors share with you many years of combined experience in the pharmaceutical and academic environment and in the writing of successful outcome driven documents

What Editors Want Philippa J. Benson, Susan C. Silver, 2013 Research publications have always been key to building a successful career in science yet little if any formal guidance is offered to young scientists on how to get research papers peer reviewed accepted and published by leading scientific journals With *What Editors Want* Philippa J Benson and Susan C Silver two well respected editors from the science publishing community remedy that situation with a clear straightforward guide that will be of use to all scientists Benson and Silver instruct readers on how to identify the journals that are most likely to publish a given paper how to write an effective cover letter how to avoid common pitfalls of the submission process and how to effectively navigate the all important peer review process including dealing with revisions and rejection With supplemental advice from more than a dozen experts this book will equip scientists with the knowledge they need to usher their papers through publication

Handbook of Meta-Research Alis Oancea, Gemma E. Derrick, Nuzha Nuseibeh, Xin Xu, 2024-02-12 A collective project arising from a dynamic configuration of research concerned with systematic critical and reflexive inquiry into the normative frames institutional workings and lived realities of research this dexterously crafted Handbook acts as a working guide to the rapidly evolving interdisciplinary field of meta research Bringing together cutting edge multidisciplinary scholarship it expertly outlines key domains including the public value policy and governance of research knowledge dynamics and research cultures and careers This title contains one or more Open Access chapters

Principles and Practice of Systematic Reviews and Meta-Analysis Sanjay Patole, 2021-06-26 Evidence based medicine is at the core of modern medicine It involves the integration of individual clinical expertise with the best available clinical evidence from systematic research and patient s values and expectations Systematic reviews offer a summary of the best available evidence They are the most reliable and comprehensive statement about what works Written by clinical academics from Australia UK USA and Switzerland this contributed volume introduces the readers to the principles and practice of systematic reviews and meta analysis It covers the various steps involved in systematic reviews including development of a focused question and the strategy for conducting a comprehensive literature search identifying studies addressing the underlying question assessment of heterogeneity and the risk of bias in the included studies data extraction and the approach to meta analysis Crucial issues such as selecting the model for meta analysis generating and interpreting forest plots assessing the risk of publication bias cautions in the interpretation of subgroup and sensitivity

analyses rating certainty of the evidence using GRADE guideline and standardized reporting of meta analysis PRISMA are covered in detail Every attempt is made to keep the narrative simple and clear Mathematical formulae are avoided as much as possible While the focus of this book is on systematic reviews and meta analyses of randomised controlled trials RCTs the gold standard of clinical research the essentials of systematic reviews of non RCTs diagnostic test accuracy studies animal studies individual participant data meta analysis and network meta analysis are also covered Readers from all faculties of medicine will enjoy this comprehensive and reader friendly book to understand the principles and practice of systematic reviews and meta analysis for guiding their clinical practice and research

information is available at <http://www.ScholarlyEditions.com> Trends and Challenges of Medical Education in the Changing Academic and Public Health Environment of the 21st Century Mainul Haque, Mohammed S. Razzaque, Md Anwarul Azim Majumder, 2023-04-20 Springer Handbook of Science and Technology Indicators Wolfgang Glänzel, Henk F. Moed, Ulrich Schmoch, Mike Thelwall, 2019-10-30 This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system Focusing on various aspects of the development and application of indicators derived from data on scholarly publications patents and electronic communications the individual chapters written by leading experts discuss theoretical and methodological issues illustrate applications highlight their policy context and relevance and point to future research directions A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources presenting both traditional and advanced approaches It addresses the main bibliographic metrics and indexes such as the journal impact factor and the h index as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society It also presents and critically discusses various national research evaluation systems Complementing the sections reflecting on the science system the technology section includes multiple chapters that explain different aspects of patent statistics patent classification and database search methods to retrieve patent related information In addition it examines the relevance of trademarks and standards as additional technological indicators The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance Finding and Using Health and Medical Information on the Internet Betsy Anagnostelis, Alison Cooke, Sue Welsh, 2004-06-17 This new guide focuses on the different uses and applications of biomedical information resources available on the Internet It explains not only how to find the best information resources quickly and effectively but also how to customise Internet tools to your own personal requirements Both authors have been associated with the development of OMNI Organising Medical Networked Information and BIOME Partial contents Introduction Electronic communication Discussion lists and electronic fora Electronic journals and newsletters Teaching material and continuing medical education Health care information Consumer health information Meetings and conferences Grants and jobs Directories of research projects and expertise Search strategies Customising your browser Creating your own home pages **The Clinical Research Handbook: A Practical Guide To Designing, Conducting And Publishing Clinical Research** Mohammad Faizan Khan, Nolan J Brown, Julian Gendreau, Ronald Sahyouni, Aaron Cohen-gadol, 2025-07-18 Through clinical research field changing ideas are formulated tested and ultimately translated into clinical practice with the goal of improving healthcare for generations to come From a practical perspective there is a need for medical students both in the United States and internationally to be exposed to clinical research in their

medical education In the United States many students are encouraged to perform research in medical school for the overall advancement of the field and also to become competitive for the medical residency match process The latter point has become even more important over the past two years as Step 1 has recently become pass fail and thus many students are turning to research to become competitive candidates in their field of interest However often in the clinical environment academic mentors are often busy and in some medical schools difficult to find Therefore students in these situations need a written resource that describes how to perform research for junior medical professionals Internationally some medical students may have difficulty finding mentors in guiding them to perform effective clinical research Therefore in The Clinical Research Handbook the authors attempt to provide a concise and effective reading that allows individuals to gain introductory knowledge in performing clinical research We completely describe the process of research by describing how to formulate ideas test these ideas and submit these ideas as publishable manuscripts to journals Specifically we cover many key concepts such as Where possible we take all opportunities to explain these subjects in non technical and easy to understand terms and each chapter is designed to be read as a unique individual reading in an effort to save time for the reader Since this is primarily aimed at individuals that are junior in their career we aim to make this reading as low of a cost as possible Using our book medical students will be able to go from formulating ideas to accepted publication by using all of the information provided here

Clinical and Translational Research in Prostate Cancer Ran Xu,Sifeng Qu,Dong Lin,2024-01-03

Encyclopedia of Language and Linguistics ,2005-11-24 The first edition of ELL 1993 Ron Asher Editor was hailed as the field s standard reference work for a generation Now the all new second edition matches ELL s comprehensiveness and high quality expanded for a new generation while being the first encyclopedia to really exploit the multimedia potential of linguistics The most authoritative up to date comprehensive and international reference source in its field An entirely new work with new editors new authors new topics and newly commissioned articles with a handful of classic articles The first Encyclopedia to exploit the multimedia potential of linguistics through the online edition Ground breaking and International in scope and approach Alphabetically arranged with extensive cross referencing Available in print and online priced separately The online version will include updates as subjects develop ELL2 includes c 7 500 000 words c 11 000 pages c 3 000 articles c 1 500 figures 130 halftones and 150 colour Supplementary audio video and text files online c 3 500 glossary definitions c 39 000 references Extensive list of commonly used abbreviations List of languages of the world including information on no of speakers language family etc Approximately 700 biographical entries now includes contemporary linguists 200 language maps in print and online Also available online via ScienceDirect featuring extensive browsing searching and internal cross referencing between articles in the work plus dynamic linking to journal articles and abstract databases making navigation flexible and easy For more information pricing options and availability visit www.infosciencedirect.com The first Encyclopedia to exploit the multimedia potential of linguistics Ground breaking in scope wider
