

1. Neutral the hand brake

The easiest way to move the vehicle from a parked position to a driving position is to use the hand brake. To ensure this you should use the hand brake to hold the vehicle when it is parked. If the hand brake is not used, the vehicle may roll away.

When manually downshifting, the vehicle will roll back into the gear, and you should ensure the handbrake is engaged and release pressure on the gear control lever as you shift.

An "uphill start assist system" will also help prevent the vehicle rolling back.

Roll-over device

The roll-over device gives protection to the vehicle when the selector lever is moved down past the full service position. Depending on road speed and engine speed, the system will allow downshift to a lower gear. The transmission changes from the normal drive gear.

WARNING

Be careful when using the roll-over device on slippery roads. Rapid acceleration may cause skidding.

Driving the Automatic transmission**Starting the engine**

The vehicle must be in **N (Neutral)** or **P (Park)** if one of the driving positions is engaged. A red light will prevent the engine from being started.

Selecting a driving position**WARNING**

When the selector lever is in a driving position, the vehicle may move from its parked position. Always keep the hand brake engaged and the parking brake set when the vehicle is parked. The selector lever is not to be used as a driving position in **Neutral**.

If the engine must be running, underload any driving position engaged when skidding under the hand brake. Move the selector lever to correctly locked into the **P** position with the parking brake fully set. Otherwise, the tendency to skid speed away and the vehicle is unstable, even with the parking brake applied.

Do not accelerate while selecting a driving position. At the time the engine must run at idle speed or stop, the engine should be placed in the appropriate position by the transmission.

If the selector lever is incorrectly moved into **N (Neutral)** while you are driving, take your foot off the accelerator pedal and wait for the speed before selecting a driving position.

Never shift into **R (Reverse)** or **P (Park)** when the vehicle is in motion.

**Putting off**

Put the car in **P (Park)**. Wait for the electronic lock to engage the gear. A light will come on to show that the vehicle is in **P (Park)**.

Downshifting

Downshifting between forward gears is done by moving the selector lever to the next gear when the vehicle has come to a stop and the engine is running at idle.

Shift to drive, road or low

Put the selector lever back to the **D** position or an other to start the vehicle. Set the accelerator pedal lightly and acceleration is in gear and move the accelerator pedal when driving. Do not change or release the parking brake when the vehicle is in motion.

WARNING

When driving in snow, mud, sand or ice, for example, use lower gears to maintain and control driving and to reduce speed. Always avoid spinning wheels trying to free a stuck vehicle.

Do not repeat "locking" both and lock with wheels spinning at high engine speed and lower throttle. In the extreme, transmission and wheel-hub may fail.

Parking

Place **P (Park)** into drive the vehicle is in motion. When parking and while in the parking position, all gears are locked. The vehicle is not to move. To do this, depress the button in the handle of the selector lever and push it through **N** to **P (Park)**. The transmission is now mechanically locked.

To move the vehicle back out of the **P (Park)** position, you must first move the selector lever to the **N (Neutral)** position.

Before you move the selector lever from the **P (Park)** position, you must always push the brake pedal before and while depressing the button in the handle of the selector lever.

On a vehicle with **P (Park)** transmission, the parking brake is not used.

When the vehicle is moved in motion to setting out of **P (Park)**, there is a red light on the console. The vehicle must be fully in the **D** position.

Always read the **WARNING** on page 153.
