Guerrilla Networks Michael Goddard,2025-10-01 The radical youth movements of the 1960s and 70s gave rise to both
militant political groups ranging from urban guerrilla groups to autonomist counterculture as well as radical media including
radio music film video and television This book is concerned with both of those tendencies considered as bifurcations of
radical media ecologies in the 1970s While some of the forms of media creativity and invention mapped here such as militant
film and video pirate radio and guerrilla television fit within conventional definitions of media others such as urban guerrilla
groups and autonomous movements do not Nevertheless what was at stake in all these ventures was the use of available
means of expression in order to produce transformative effects and they were all in different ways responding to ideas and
practices of guerrilla struggle and specifically of guerrilla media This book examines these radical media ecologies as
guerrilla networks emphasising the proximity and inseparability of radical media and political practices Radio's Master
,1949 *Interim Report by the Office of Network Study* United States. Federal Communications Commission,1960 **The**

Office of Network Study United States. Federal Communications Commission,1965 **Industrial Engineering** ,1927

From City Space to Cyberspace Amanda Wasielewski,2025-10-01 The narrative of the birth of internet culture often
focuses on the achievements of American entrepreneurs in Silicon Valley but there is an alternative history of internet
pioneers in Europe who developed their own model of network culture in the early 1990s Drawing from their experiences in
the leftist and anarchist movements of the 80s they built DIY networks that give us a glimpse into what internet culture could
have been if it were in the hands of squatters hackers punks artists and activists In the Dutch scene the early internet was
intimately tied to the aesthetics and politics of squatting Untethered from profit motives these artists and activists aimed to
create a decentralized tool that would democratize culture and promote open and free exchange of information
