Education Reform in the American States Jerry McBeath, Maria Elena Reyes, Mary Ehrlander, 2008-04-01

Education Reform in the American States is a timely evaluation of the accountability movement in American public education culminating in the No Child Left Behind Act federal legislation of 2002 The authors treat the current accountability movement placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding They provide case studies of the educational accountability movements in nine states and analyze the factors and forces which explain progress in achievement levels as measured on standardized tests and the states prospects for meeting their NCLB targets The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act particularly its incentives for states to lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from districts with the highest percentage of disadvantaged students The audience for this study includes local state and federal education policy makers administrators and instructors in schools of education and other teaching programs educators and the general public

Wise Social Studies in an Age of High-Stakes Testing Elizabeth Anne Yeager, O. L. Davis, 2005-08-01 The chapters in this

volume illustrate how teachers are bringing creativity higher order thinking and meaningful learning activities into particular school settings despite pressures of standards and testing We chose the word wise for the title of this book and we use it frequently to describe the pedagogical practices we have identified The words powerful and ambitious are used as well The larger point as Keith C Barton makes in his chapter is that there is no necessary connection between content standards and high stakes tests on the one hand and lowlevel rote instruction on the other He reminds us as Thornton 1991 and Wiggins 1987 previously have argued that teachers play a crucial role in mediating educational policy and their intentions and interpretations have at least as much influence on classroom practice as does the content of standards and highstakes tests Barton also asserts that this makes it all the more crucial to identify the wisdom of practice that enables teachers to engage students in powerful educational experiences

The Race Controversy in American Education Lillian Dowdell Drakeford Ph.D.,2015-07-28 In this unique two volume work expert scholars and practitioners examine race and racism in public education tackling controversial educational issues such as the school to prison pipeline charter schools school funding affirmative action and racialized curricula This work is built on the premise that recent efforts to advance color blind race neutral educational policies and reforms have not only proven ineffective in achieving racial equity and equality of educational opportunities and outcomes in America s public schools but also exacerbated existing inequalities That point is made through a collection of essays that examine the consequences of racial inequality on the school experience and success of students of color and other historically marginalized populations Addressing K 12 education and higher education in historically black as well as predominantly white institutions the work probes the impact of race and racism on education policies and reforms to determine the role schools school processes and school structures play in the perpetuation of racial inequality in American education Each volume validates the impact of race on teaching and learning and exposes the ways in which racism manifests itself in U S schools In addition practical recommendations are presented that may be used to confront and eradicate racism in education By exposing what happens when issues of race and racism are marginalized or ignored this collection will prepare readers to resist and perhaps finally overcome the racial inequality that plagues America s schools

From Schoolhouse to Courthouse Martin R. West,Joshua Dunn,2010-02-01 A Brookings Institution Press and the Thomas B Fordham Institute publication From race to speech from religion to school funding from discipline to special education few aspects of education policy have escaped the courtroom over the past fifty years Predictably much controversy has ensued Supporters of education litigation contend that the courts are essential to secure student and civil rights while critics insist that the courts distort policy and that the mere threat of litigation undermines the authority of teachers and administrators From Schoolhouse to Courthouse brings together experts on law political science and education policy to test these claims Shep Melnick Boston College and James Ryan University of Virginia School of Law draw lessons from judicial efforts to promote school desegregation and civil rights Martha Derthick University of Virginia John Dinan Wake Forest

University and Michael Heise Cornell Law School discuss litigation over high stakes testing and school finance in the era of No Child Left Behind Richard Arum New York University Samuel R Bagenstos Washington University Law School and Frederick M Hess American Enterprise Institute analyze the consequences of court rulings for school discipline special education and district management Finally editors Joshua Dunn and Martin R West probe the tangled relationship between religious freedom student speech and school choice *Congressional Record* United States.
