Carpenter,Timothy D. Comar,2013 There is a gap between the extensive mathematics background that is beneficial to biologists and the minimal mathematics background biology students acquire in their courses The result is an undergraduate education in biology with very little quantitative content New mathematics courses must be devised with the needs of biology students in mind In this volume authors from a variety of institutions address some of the problems involved in reforming mathematics curricula for biology students The problems are sorted into three themes Models Processes and Directions It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section Processes deals with taking that great course and making sure it is institutionalized in both the biology department as a requirement and in the mathematics department as a course that will live on even if the creator of the course is no longer on the faculty Directions looks to the future with each paper laying out a case for pedagogical developments that the authors would like to see

Chesapeake Bay Resources Directory ,1990 *Wise Social Studies in an Age of High-Stakes Testing* Elizabeth Anne Yeager,O. L. Davis,2005-08-01 The chapters in this volume illustrate how teachers are bringing creativity higher order thinking and meaningful learning activities into particular school settings despite pressures of standards and testing We chose the word wise for the title of this book and we use it frequently to describe the pedagogical practices we have identified The words powerful and ambitious are used as well The larger point as Keith C Barton makes in his chapter is that there is no necessary connection between content standards and high stakes tests on the one hand and lowlevel rote instruction on the other He reminds us as Thornton 1991 and Wiggins 1987 previously have argued that teachers play a crucial role in mediating educational policy and their intentions and interpretations have at least as much influence on classroom practice as does the content of standards and highstakes tests Barton also asserts that this makes it all the more crucial to identify the wisdom of practice that enables teachers to engage students in powerful educational experiences

Berube,2008-06-01 Modern educators are currently

ideologically in one of two camps those who see American education as heading in the right direction and those who fear that it has gone tragically astray For over 100 years the American educational system has been the hope of those who want to level the playing field of opportunity yet today we continue to lag behind several industrialized countries when comparing standardized science test scores Is this acceptable in the most advanced affluent country on earth Why are we not the reigning educational system on the planet And are standardized test scores even the best way to assess the type of learning it takes to lead the world in science achievement The nature of science does not lend itself well to bubble tests yet these assessments are all we have to prove that our students are good scientists This book was born of a science teacher s frustration brought on by the standardized testing movement s reliance on high stakes tests as the sole measurement tool with which to measure achievement Science by it s very nature relies on original thinking for discovery and innovation How

can this be measured by a bubble test And how do these high stakes tests affect minorities girls those with disabilities and at risk students September 11 2001 alerted us that we Americans can be less creative than our enemies an unprecedented event in American history What if changing the way we teach and assess science learning better prepares our citizens for creative preventions and solutions to world problems instead of creating citizens who have to react to world problems The nature of science begs a better way **The Virginia Journal of Science** Ruskin Skidmore Freer,1999 **Brookings Papers on Education Policy: 2002** Diane Ravitch,2010-12-01 Published annually Brookings Papers on Education Policy BPEP analyzes policies intended to improve student performance In each volume some of the best informed analysts in various disciplines review the current situation in education and consider programs for reform In this fifth annual issue of the series prominent educators and other social scientists discuss accountability and its consequences for students Contents include Grade Retention and Social Promotion in Texas 1994 99 A Gary Dworkin Jon Lorence Laurence Toenjes and Antwanette Hill University of Houston Reform Resistance Retreat The Predictable Policies of Accountability in Virginia Frederick Hess University of Virginia School Accountability in California An Early Evaluation Julian Betts UC San Diego and Public Policy Institute of California and Anne Danenberg Public Policy Institute of California Standards and Accountability in Washington State Paul Hill and Robin Lake University of Washington Volatility in School Test Scores Implications for Test Based Accountability Systems Tom Kane Kennedy School of Government Harvard University and Douglas O Staiger Dartmouth College Building a High Quality Assessment Program The Philadelphia Example Andy Porter Wisconsin Center for Education and Research and Mitchell Chester Philadelphia School System Accountability in Chicago Alfred Hess Northwestern University *Virginia Journal of Science* Ruskin Skidmore Freer,2000
