Visual Identities Jean-Marie Floch, 2001-01-01 The six essays of Visual Identities are an important contribution to the growing field of industrial semiotics Floch's major strength is his analysis of signs in a way which is both industrially relevant and textually precise Until recently there have been two quite different and distinct ways of understanding commercial signs such as logos and advertisements Industry based work has tended to look at questions of marketing and has often been reduced to the mass psychology of appeal and audience research whereas the textual analysis of commercial signs has tended to come from limited positions of identity politics and criticism Marxism feminism etc Floch manages to find a way between and also outside these traditions In doing so he has produced a book which will interest industrial practitioners in advertising marketing and design as well as students and academics in semiotics Visual Research Methods in the Social Sciences Stephen Spencer, 2010-12-17 Visual Research Methods is a guide for students researchers and teachers in the social sciences who wish to explore and actively use a visual dimension in their research This book offers an integrated approach to doing visual research showing the potential for building convincing case studies using a mix of visual forms including archive images media maps objects buildings and video interviews Examples of the visual construction of place social identity and trends of analysis are given in the first section of the book whilst the essays in the second section highlight the astonishing creativity and innovation of four visual researchers Each detailed example serves as a touchstone of quality and analysis in research with themes ranging from the ethnography of a Venezuelan cult goddess to the forensic photography of the skeleton of a fourteenth century nobleman They give a keen sense of the motives philosophies and benefits of using visual research methods This volume will be of practical interest to those embarking on visual research as well as more experienced researchers Key concerns include the power of images and their changing significance in a world of cross mediation techniques of analysis and ethical issues and how to unlock the potential of visual data for research **The Palgrave Handbook of Image Studies** Krešimir Purgar, 2021-10-01 This handbook brings together the most current and hotly debated topics in studies about images today In the first part the book gives readers an historical overview and basic diachronical explanation of the term image including the ways it has been used in different periods throughout history In the second part the fundamental concepts that have to be mastered should one wish to enter into the emerging field of Image Studies are explained In the third part readers will find analysis of the most common subjects and topics pertaining to images In the fourth part the book explains how existing disciplines relate to Image Studies and how this new scholarly field may be constructed using both old and new approaches and insights The fifth chapter is dedicated to contemporary thinkers and is the first time that theses of the most prominent scholars of Image Studies are critically analyzed and presented in one place **Semiotics and its Masters. Applying structuralist semiotics to brand image research George Rossolatos, 2013 The aim of this paper is to display a conceptual and methodological framework for brand image research by drawing on the discipline of structuralist semiotics Upon a critical review of existing research from key authors in the brand semiotics literature and through an engagement with the concept of brand image as formulated by key authors in the marketing literature a semiotic model is furnished for the formation of brand image and brand identity By drawing on the structuration process of brand image along the three major strata in a brand's signification trajectory and the key operations of reduction redundancy recurrence isotopy homologation I focus more narrowly on how the chaining enchainment of elements from the three strata is effected with view to addressing how brand image may be operationalised in structuralist semiotic terms vis a vis a brand's intended positioning how it may be linked to a brand's advertising discourse and how the conceptual framework may yield a platform for ongoing brand image analysis and management

//Rhetor. Dixit// Understanding Ad Texts' Rhetorical Structure for Differential Figurative Advantage George Rossolatos, 2013-08-26 This book was put together over the course of the past three years and is the outcome of the author's publications in the multimodal advertising rhetoric research field and projects that were undertaken with the employment of the rhetor dixit c model It features four chapters that span different yet interlocking aspects of ad texts multimodal rhetorical configuration and culminates in a practical guide for the analysis of the verbo visual rhetorical structure of TV ad texts based on the unique methodology of the rhetor dixit c model on offer by disruptiVesemiOtics rhetor dixit Understanding ad texts rhetorical structure for differential figurative advantage neither seeks to cover exhaustively issues in any of the traditional fields of concern to the discipline of rhetoric an impossible endeavor indeed within the contours of a single book nor to address all issues on top of the current agenda in multimodal advertising rhetoric Its mission is to present key facets of current research in multimodal advertising discourse largely dispersed and spread out in multiple disciplines including semiotics in such a manner as to enable the reader to get to grips with the benefits that stem from employing a content analytic approach for the ongoing management of the modes of rhetorical configuration of advertising texts The combination of an interpretivist approach with the methodical outlook yielded by content analysis affords to transform multimodal rhetorical analysis of advertising texts from a theoretical enterprise geared towards making sense of how meaning emerges through the figurative language of advertising to a

systematic method for managing advertising textuality in such a manner as to enable practitioners in marketing related disciplines e.g. account planning, marketing research, brand management to actively manage how brand meaning is generated through distinctive modes of rhetorical configuration. The managerial orientation of the rhetorical model is intended to enhance understanding as to how a brand's intellectual capital is configured and moreover to point to directions whereby what I call a brand's figurative first mover advantage and differential figurative advantages may be furnished to a brand's discourse. The systematic understanding of a brand's distinctive modes of rhetorical configuration is not just a nice to have add-on in a metrics dashboard but a prerequisite for managing brands as constellations of figurative elements and modes of connectivity among figurative elements which are part and parcel of a brand's textual essence.

Semiotics and Visual Communication II Evripides Zantides, 2018-04-18. The chapters in this book consist of selected papers that were presented at the 2nd International Conference and Poster Exhibition on Semiotics and Visual Communication at the Cyprus University of Technology in October 2015. They investigate the theme of the Conference: Culture of Seduction, the seduction of culture and look at Seduction as in deception, not sexual enticement but as a mechanism of attraction and appeal which has often been the case in many communication strategies and approaches used by mass and popular culture. Seduction has historic and increasing agency in visual communication; the urgency to entice viewers is ever more powerful in difficult economic times in an increasingly hyper-real world and designers are led to become exceedingly complicit in its strategies. The contributions here cover a range of approaches from theoretical aspects of seduction in verbal and nonverbal communication, public spaces, design and meaning, seductive strategies and advertising design as well as fashion representations and packaging design.

Semiotics and Visual Communication III Evripides Zantides, 2019-11-12. The chapters in this book consist of selected papers that were presented at the 3rd International Conference and Poster Exhibition on Semiotics and Visual Communication at the Cyprus University of Technology in November 2017. They investigate the theme of the third conference: The Semiotics of Branding and look at branding and brand design as endorsing a reputation and inhabiting a status of almost mythical proportion that has triumphed over the past few decades. Emerging from its forerunner corporate identity to incorporate advertising, consumer lifestyles and attitudes, image rights, market research, customisation, global expansion, sound and semiotics and the consumer as the brand, the word branding currently appears to be bigger than its own umbrella definition. From tribal markers such as totems, scarifications and tattoos to emblems of power, language, fashion, architectural space, insignias of communal groups, heraldic devices, religious and political symbols, national flags and the like, a form of branding is at work that responds to the need to determine the presence and interaction of specific groups, persons or institutions through shared codes of meaning.
