Virtual Justice H. Richard Uviller, 2008-10-01 Sensational trials obsessively televised and reported by news media have led many Americans to question the effectiveness of their criminal justice system Do police have the laws they need or the competence to do their job Can juries recognize the truth in the tangle of evidence presented to them What do lawyers actually contribute to the quest for justice in the criminal court In this fascinating book a distinguished legal authority examines the flaws contradictions and weaknesses in our American justice system The gripping stories he tells about the investigation and trial of criminal cases reveal what's really going on and demonstrate how the system often fails to deliver true justice H Richard Uviller deftly covers major aspects of the criminal justice process from the gathering of evidence capture and custody and eyewitness identification to plea bargaining selecting the jury and the role of the judge He illuminates each aspect of the process by creating and then analyzing a scenario drawn from the daily business of the courtrooms of the nation a scenario in which police or judges may find themselves frustrated or immobilized often by the law itself Uviller explains the legal quandaries that often bedevil the process and shows how decisions by the Supreme Court have relieved or aggravated perplexity He concludes that the prohibitions limiting investigation the pervasive combat mentality between defense and prosecution lawyers and in particular the power vested in a random collection of ordinary people gathered together as a jury all contribute to a criminal justice system that produces virtual rather than actual justice

the assessment of criminal justice policy examining the prospect of assessing policies based on their impact on errors of
justice the error of failing to bring offenders to justice on the one hand and the error of imposing costs on innocent people
and excessive costs on offenders on the other Noting that we have sophisticated systems for managing errors in statistical
