

Virtual Rat Dissection Guide

Introduction

In this virtual laboratory exercise, the anatomy of the rat will be examined in some detail. By the end of the lab you should know the anatomy and physiology of the rat fairly well.

The classification of the Rat (*Rattus norvegicus*)

Kingdom Animalia
Phylum Chordata
Subphylum Vertebrata
Class Mammalia
Order Rodentia
Family Muridae
Genus *Rattus*
Species *norvegicus*

Background Information

The lab books and diagrams available to you are supplemental. **You are expected to follow the directions in this lab. Failure to do so will result in a 0 for that day's grade.** You will be held responsible for being able to locate all the structures. You are expected to have exhausted all possibilities in attempting to locate structures before asking for assistance. Using the available material, instructions and diagrams, most students will be able to locate many structures for themselves. If after an earnest effort, you cannot find a structure, ask for assistance. Remember, this is a learning experience; it is quite permissible to discuss and observe other students' specimens. Be sure to look at animals of the opposite sex; you will be responsible for both sexes on the lab practical.

The rat is a vertebrate, which means that many aspects of its structural organization are common with all other vertebrates, including man. The similarity of structures among related organisms shows evidence of common ancestry. In a way, studying the rat is like studying a human. As the theme of this lab, ask yourself: for every structure observed in the rat, there is an equivalent structure in your own body - what is the structure and where is it located.

As the second theme of this lab, pay particular attention to the relationships among organs and groups of organs. Structural parts are not "just there" in random locations. Their specific layout within the body contributes to making certain functions possible. Therefore, for every structure seen, you should determine the following:

- What organ system it belongs to
- How it is connected with other components
- Its general function
- Its specific function (if applicable)
