Inclusive Education in South African Further and Higher Education Tsedis Michael Makoelle, 2025-05-26 A historical overview of the evolution of inclusive education alongside the emergence of concepts such as equity and access, highlighting how these ideas have evolved, been enacted and practiced in the higher education institutions (HEIs) of South Africa since 2001. *Higher Education Pathways* Ashwin, Paul, Case, Jennifer M., 2018-12-14 In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public as well as private benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

Post-independence Africa: Perspectives on Political and Socio Economic Mutations René Ngeke Monteh, Nixon Kahjum Takor, 2023-07-20 The colonial period and post independence era are two exciting historical pegs with shared and diametrically opposed narratives on the people and continent of Africa They are two periods with leverages of continuities and discontinuities While the colonial period for the most part left the African people as passive recipients of European socioeconomic and political values colonialism at the same time created strands of resistance that manifested variously as nationalism The outcome of the nationalist effervescence was the termination of the colonial enterprise and the appropriation of political independence The independence of most African states was accompanied by a craving to indigenize the political institutions and to orient development along African paradigms This scholarly compendium of 15 chapters integrates

different narratives on the state stakes and prospects of the African continent in responding to dynamic socio economic and political exigencies
