American Solidarity 2026 - A Message from History: A Call to Action Matthew G. Masiello MD MPH,2025-09-20 My thoughts and opinions in this pamphlet come from my lack of knowledge about a crucial moment in our country s history In October 2018 I was shocked disappointed and angry when I watched the PBS special on the eugenics movement This journey of reeducation has revealed to me that at every level of society we have failed to recognize the mistakes and challenges faced

as a free and fair nation Human beings are naturally prone to making errors sometimes with devastating effects What remains confusing and an ongoing topic for philosophers and historians is our persistent tendency mainly among white prejudiced religious zealots and often successfully to hide and disown our very real and well documented American history The school history books I reviewed omitted any mention of the American eugenics movement and the notable Americans involved in supporting this false science which promoted the sterilization of people based on poorly conducted studies and surveys Our challenging history brings us from the eugenics movement of the early 1900s to World War II and the Holocaust Our history books fail to acknowledge the education Hitler received from the political and social events taking place in America as well as the significant support he received from our so called American heroes and political figures of that era The eugenics inspired strict immigration laws along with the widespread antisemitism among politicians religious leaders and ordinary Americans prevented thousands of Jews from escaping to safety including Anne Frank s family In this pamphlet I aimed to connect the dots between various events including the Native American genocide and the injustice and violence faced by Black Americans Hitler observed these issues and exploited them for his own gain This history is well documented yet very little was shared or taught during my early education Today misinformation persists about critical race theory along with the censorship and banning of books that address racism in America LGBTQ issues and many other challenging but true aspects of American history Therefore when politicians or a U S President standing at a podium and in despair say this is not America in reference to a racial or violent event occurring today it is simply not true We have a fallback a resource though And what better time in our history to recognize than that of our Founding Fathers They were intelligent stubborn and argumentative but they had the crucial task of forming a government which they accomplished over an eleven year span of time They did not operate within the framework of political parties none existed Then there was a short article written anonymously by an unknown Englishman a recent immigrant to this young nation This article quickly grew into a 47 page pamphlet Common Sense written by Thomas Paine urging the colonists to speak out and oppose the tariffs and laws imposed by an oppressive English government With humility re education and a simple need to protect my sanity while enduring the undemocratic often violent actions of the current government in the United States I began to learn and write I used Paine s Common Sense as my guide and inspiration although I claim no similarity beyond that I hope however that this pamphlet will spark the start of a conversation and planning for our era s most significant peaceful solidarity movement It is a time for honesty It s time to identify empathetic compassionate experienced and intelligent leaders to guide us into the next 250 years of our democracy

Contested Curriculum Don Romesburg, 2025-04-15 Today many states have proposed so called Don t Say Gay bills that prohibit public school teachers from mentioning LGBTQ topics in the classroom But a few states like California have taken decisive steps in the other direction They mandate inclusive education that treats LGBTQ history as essential to the curriculum At once a history of an evolving movement and an activist handbook Contested Curriculum

navigates the rocky path to LGBTQ inclusive K 12 history education in the United States and recounts the fight for a curriculum that recognizes the value of queer and trans lives What began in fits and starts in activism and educational materials across the late twentieth century led to the passage of California s landmark FAIR Education Act in 2011 ensuring that LGBTQ history has a place in the K 12 classroom Historian Don Romesburg the lead scholar who worked with advocacy organizations to pass the act recounts the decades long struggle to integrate LGBTQ content into history education policy textbooks and classrooms Looking at California and states that followed its lead he assesses the challenges and opportunities presented by this new way of teaching history Romesburg s powerful case for LGBTQ inclusive education is all the more urgent in this era of anti gay book bans regressive legislation and attempts to diminish the vital role that inclusive and honest history education should play in a democratic nation *United States: History+government* Glencoe,2005-01-01

and Part 4 closely considers how we can expand educational opportunities for marginalized groups within STEM education. The book will make invaluable reading for graduate students and researchers in Education, particularly Social Justice Education, Multicultural Education, Educational Policy and Politics, STEM Education, and Social Studies Education, as well as policymakers in service, teachers, administrators, and activists.
