The Law of Maritime Blockade Phillip Drew, 2017-12-08 Although appearing to be a relatively benign method of warfare when viewed from a distance a close examination of maritime blockade unveils a sinister character that can in cases where countries are highly reliant on imports of foodstuffs to feed their populations prove incredibly deadly particularly for the young and elderly This book is unique in that it is the only contemporary book that is dedicated to the study of the law of maritime blockade in the context of modern humanitarian law Reviewing the development of blockade law over the past four centuries The Law of Maritime Blockade provides a historical analysis of the law as it emerged tracing its evolution through armed conflicts between 1684 and the present Referring to the starvation caused by the blockade of Germany during World War I and the humanitarian crisis caused by the sanctions regime against Iraq 1991 2003 this book demonstrates that blockade can have extremely deleterious effects for vulnerable civilian populations In this context the current law of blockade is examined and found to be deficient in terms of its protection for civilians Recognizing and advocating that blockade should remain as a valid and effective method of warfare the book offers a template for a modern law of maritime blockade that incorporates many of the traditional aspects of the law while reducing the possibilities that blockades can cause or exacerbate humanitarian disasters

Customary International Humanitarian Law Jean-Marie Henckaerts, Louise Doswald-Beck, Carolin Alvermann, 2005-03-03 Customary International Humanitarian Law Volume I Rules is a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non international armed

conflicts In the absence of ratifications of important treaties in this area this is clearly a publication of major importance carried out at the express request of the international community In so doing this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts *U.S. Military Operations* Geoffrey S. Corn, Rachel E. VanLandingham, Shane R. Reeves, 2016 In *U S Military Operations Law Policy and Practice* a distinguished group of military experts comprehensively analyze how the law is applied during military operations on and off the battlefield The authors focus on how the law is actually implemented in a wide swath of military activities *Commentary on the Third Geneva Convention*, 2021-09-09 The application and interpretation of the four Geneva Conventions of 1949 and their two Additional Protocols of 1977 have developed significantly in the seventy years since the International Committee of the Red Cross ICRC first published its Commentaries on these important humanitarian treaties To promote a better understanding of and respect for this body of law the ICRC commissioned a comprehensive update of its original Commentaries of which this is the third volume The Third Convention relative to the treatment of prisoners of war and their protections takes into account developments in the law and practice in the past seven decades to provide up to date interpretations of the Convention The new Commentary has been reviewed by humanitarian law practitioners and academics from around the world This new Commentary will be an essential tool for anyone involved with international humanitarian law

The Development and Principles of International Humanitarian Law Michael N. Schmitt, 2017-07-05 The essays selected for the first part of this volume offer an insight into the development as distinguished from the history of international humanitarian law The focus of the majority of the works reprinted here is on an analysis of the adequacy of the law as it stood at the time of the respective publication and in the light of existing contemporary armed conflicts and military operations Thus the reader is afforded an in depth look at the early roots of international humanitarian law the continuing relevance of that body of law despite advances in weapons technology and the efforts to progressively develop it International humanitarian law's development cannot be considered in isolation from its principles The essays selected for the second part of the volume deal with the two fundamental principles underlying all of international humanitarian law humanity and military necessity The articles on the principles of humanity include reflections on the famous Martens Clause and the analyses of military necessity take no account of *Kriegsraison* Moreover they offer proof of the customary character of the principle of distinction in land air and naval warfare

Intersections in International Cultural Heritage Law Anne-Marie Carstens, Elizabeth Varner, 2020-05-15 The recent spate of threats to cultural heritage including in Iraq Mali Nepal Syria and Yemen has led to increased focus on the sources of international cultural heritage law This edited volume shows that international cultural heritage law is not a discrete and contained body of law but one whose component parts are drawn from diverse fields of public international law It shows how cultural heritage law has been shaped by its interaction with other areas of international law and how it has contributed to international law in turn In this volume scholars and practitioners explore

some of the primary points of intersection between international cultural heritage law and public international law Chapters explore intersections with the law of armed conflict international and transnational criminal law international human rights the international movement regulation and restitution of cultural artefacts and the UN system The result is a cohesive collection that not only explores many facets of the intersections of cultural heritage law and public international law but also examines how the regimes operate together and how the relationship between them largely facilitates but also sometimes hinders the development of international law governing the protection of cultural heritage

Necessity, Proportionality and the Use of Force by States Judith Gardam, 2004-11-18 There has been considerable debate in the international community as to the legality of the forceful actions in Kosovo in 1999 Afghanistan in 2002 and Iraq in 2003 under the United Nations Charter There has been consensus however that the use of force in all these situations had to be both proportional and necessary Against the background of these recent armed conflicts this 2004 book offers the first comprehensive assessment of the twin requirements of proportionality and necessity as legal restraints on the forceful actions of States It also provides a much needed examination of the relationship between proportionality in the law on the use of force and international humanitarian law
