Biomedical Hegemony and Democracy in South Africa Ngambouk Vitalis Pemunta, Tabi Chama-James Tabenyang, 2020-12-29 In *Biomedical Hegemony and Democracy in South Africa* Ngambouk Vitalis Pemunta and Tabi Chama James Tabenyang unpack the contentious South African government's post apartheid policy framework of the return to tradition policy. The conjuncture between deep sociopolitical crises, witchcraft, the ravaging HIV/AIDS pandemic and the government's initial reluctance to adopt antiretroviral therapy turned away desperate HIV/AIDS patients to traditional healers. Drawing on historical sources, policy documents and ethnographic interviews, Pemunta and Tabenyang convincingly demonstrate that despite biomedical hegemony, patients and members of their therapy seeking group often shuttle between modern and traditional medicine, thereby making both systems of healthcare complementary rather than alternatives. They draw the attention of policy makers to the need to be aware of subaltern health narratives in designing health policy.

Culture and Rural-Urban Revitalisation in South Africa Mziwoxolo Sirayi, Modimowabarwa Kanyane, Giulio Verдини, 2021-06-14 This book captures ground breaking attempts to utilise culture in territorial development and regeneration processes in the context of South Africa and our new normal brought by COVID 19, the fourth industrial revolution and climate change the world over. The importance of culture in rural urban revitalisation has been underestimated in South Africa and the African continent at large. Despite some cultural initiatives that are still at developmental stages in big cities such as Johannesburg, eThekweni and Cape Town, there is concern about the absence of sustainable policies and plans to support culture, creativity and indigenous knowledge at national and municipal levels. Showcasing alternative strategies for making culture central to development, this book discusses opportunities to shift culture and indigenous knowledge from the peripheries and place them at the epicentre of sustainable development and the mainstream of cultural planning, which can then be applied in the contexts of Africa and the Global South. Governmental institutions, research councils, civil society organisations, private sector and higher education institutions come together in a joint effort to explain the nexus between culture, economic development, rural urban linkages, grassroots and technological innovations. *Culture and Rural Urban Revitalization in South Africa* is an ideal read for those interested in rural and urban planning, cultural policy, indigenous knowledge and smart rural village model.

African Indigenous Medical Knowledge and Human Health Charles Wambebe, 2018-01-29 Despite the relevance of and empirical evidence for African Traditional Medicine based on African Indigenous Medical Knowledge (AIMK), research and development of new phytomedicines from this continent has been slow. African Indigenous Medical Knowledge and Human Health aims to provide a catalyst for health innovations based on the rich African biodiversity and AIMK. The book documents some of the success stories from the continent related to AIMK and serves as a one step reference for all professionals interested in the research and development of medical interventions including pharmacognosists, ethnobiologists, botanists, phytochemists, pharmacologists and medical

Campbell, 2021-01-22 *Mormonism Medicine and Bioethics* provides the first comprehensive treatment of principles and positions on questions of bioethics encountered by members professionals and ecclesiastical leaders of The Church of Jesus Christ of Latter day Saints LDS or Mormon The book addresses three fundamental features of a coherent religious bioethics precepts for practical decision making general ethical principles and core religious convictions that give a distinctive motivation for personal communal and professional integrity LDS ethical principles of love hospitality to strangers covenantal solidarity justice and moral agency are integrated with central topics in bioethics including abortion genetic testing and enhancements in vitro fertilization medical assisted death medicinal marijuana neonatal intensive care organ donation preventive health care universal access to care and vaccinations This book uses first person experiences to give voice to the lived moral realities of Latter day Saints as they experience difficult and wrenching ethical questions and choices as persons family members community members professionals and as citizens within the context of their distinctive faith convictions It situates these communal conversations within the broader discourse of bioethics and thereby supports both bioethics and religious literacy

Mormonism Medicine and Bioethics also examines circumstances in which The Church of Jesus Christ of Latter day Saints engages in a moral witness of its values on matters of public policy such as legalization of physician assisted death of elective abortion and of medicinal marijuana The book concludes with a distinctive normative argument on why LDS ethical principles and practices require support of universal access to an adequate level of health care for all persons It provides an appendix of significant LDS ecclesiastical policies on medical health and moral issues making it a definitive educational and reference compilation

Traditional and Complementary Medicine Cengiz Mordeniz,2019-12-11 Modern medicine has reached a point where the patient is not treated as a biopsychosocial spiritual being but rather is seen as a virtual identity consisting of laboratory findings and images More focus is placed on relieving the symptoms instead of curing the disease Mostly patients are turned into lifetime medication dependent individuals New medicines are needed to overcome the side effects complications resistance and intolerance caused by pharmacological and interventional therapies In hopes of drug free and painless alternative treatments with fewer complications there has been a trend to revisit traditional methods that have been dismissed by modern medicine Traditional medicine has to be reevaluated with modern scientific methods to complement and integrate with evidence based modern medicine
