The essays in this collection contribute to a new history of world migrations written by specialists of particular areas of the world. Collectively, these essays point towards a shift from the regional migrations of individual seas and oceans of the early modern era toward nineteenth century labor migrations that connected the Pacific and Indian to the Atlantic Oceans. Detailed case studies demonstrate the importance of human migration in the development, consolidation, and critique of empire building theories of race, modern capitalism, and large scale commercial agriculture and industry on every continent.
