Auditing Standard No 5 An Audit of Internal Control Over Financial Reporting That is Integrated with an Audit of Financial Statements 2007 AS No 5 establishes a top down task structure on the audit of internal control over financial reporting The new AS No 5 structure unlike most other internal control task structures includes a hierarchical analysis of both schematically and taxonomically organized information Prior research suggests that auditor knowledge structures of internal controls are organized both schematically by transaction flow and taxonomically by audit objective This study investigates how an auditing task characteristic task structure interacts with decision maker characteristics attention and knowledge

structure to examine whether the new AS No 5 task structure of internal control evaluation affects governmental auditors processing of internal controls in three audit tasks control risk assessment analytic risk assessment and pattern identification Results indicate that auditors were better able to sort internal controls according to a traditional internal control task format as compared to the new AS No 5 task format However results also suggest that in a weak control environment the task format of AS No 5 affected auditor ability to weight cues as evidenced by control risk assessments and assessments of the probability of misstatement such that risk assessments were greater in the AS No 5 treatment than those of auditors using a categorical task structure Finally study findings support prior literature that suggests that as task complexity increases auditor problem solving ability correlates with improved decision performance
