The Event Literature And Theory:

The Event Ilai Rowner, 2015 What is an event From a philosophical perspective events are irregular occurrences moments of change and interruption categorized by human perception language and thought While philosophers have pored over the subject of events extensively in recent years *The Event Literature and Theory* seeks to ground it What is literature s approach to the event How does literature produce and give testimony to events Ilai Rowner s study not only revisits some of the most important thinkers of our time including Maurice Blanchot Gilles Deleuze Jacques Derrida and Martin Heidegger it also develops a critical approach to literature that questions the meaning of the literary event through examinations of literary works by Marcel Proust Louis Ferdinand Celine and T S Eliot Rowner offers a new method of thinking about the particular characteristics of the event within literary works and defines the creative value of literature as the aspiration toward the un happening within the happening In this study the experience of literature as an act of both writing and reading becomes the struggle to capture the excessive movement of the event while also revealing the creative energy within that work of literature

A Case Study of the 2004 Olympic Games in Athens, Greece Manuela Stögerer, Lisa Faulenbach, Egle Rasimaviciute, Bartek Matuszewski, Anna Schröder, Dennis Ngo, 2015-07-21 Seminar paper from the year 2014 in the subject Business economics Business Management Corporate Governance grade 2 Aalborg University language English abstract Mega Events as the Olympic Games are generators of urban change and associated with positive impact for the hosting city at first sight At the same time real life examples demonstrate that these hallmark events leave a physical imprint and commonly a challenging long lasting legacy to deal with The project Mega Events in the complex city identifies the challenges that need to be considered when making changes in the built environment while hosting a Mega Event The aim is to provide recommendations for further hosting cities in order to minimize the negative consequences a Mega Event may entail The project takes its starting point in examining the impact that a Mega Event has on the city The city as a complex system already bears a number of existing conflicts Placing a Mega Event into this complex system creates additional challenges with contradicting issues between short term vs long term planning large scaled demands vs local needs old vs new built environment as well as expectations vs reality Those challenges are approached in the case study of Athens Olympics 2004 to examine the burdens a city has to face after hosting a Mega Event Further best practice examples of the four cities London Barcelona Vancouver and Los Angeles who already hosted the Olympics in the past are presented in order to show an alternative way of dealing with the occurring challenges Through investigating positive and negative past cases of Olympics recommendations for further hosting cities are developed The recommendations comprise that Mega Events should be used as driving force for the overall cities strategy and evince long term planning Thus urban renewal can be affected positively and the after use of related large scale facilities can be ensured which reduces the financial burden for the hosting city Furthermore the social shadow a Mega Event may

entail can be countered by integrating the needs of the local community Considering these recommendations should help to lead to a positive reputation of the Mega Event and enables the cities to fulfil their hopes and expectations related to the Mega Event
