Innovative Computing 2025, Volume 1 Hao-Shang Ma,Hwa-Young Jeong,Yu-Wei Chan,Hsuan-Che Yang,2025-07-02
This book comprises select proceedings of the 7th International Conference on Innovative Computing which was held in
Bangkok Thailand Jan 19 23 2025 IC 2025 focusing on cutting edge research carried out in the areas of information
technology science and engineering Some of the themes covered in this book are cloud communications and networking high
performance computing architecture for secure and interactive IoT satellite communication wearable network and system
infrastructure management etc The essays are written by leading international experts making it a valuable resource for
researchers and practicing engineers alike The proceedings of the 10th Frontier Academic Forum of Electrical
Engineering (FAFEE2022) Qingxin Yang,Xuzhu Dong,Weiming Ma,2023-08-13 This book includes the original peer reviewed
research papers from the 10th Frontier Academic Forum of Electrical Engineering FAFEE 2022 held in Xi an China in August
2022 It gathers the latest research innovations and applications in the fields of Electrical Engineering The topics it covers
include electrical materials and equipment electrical energy storage and device power electronics and drives new energy
electric power system equipment IntelliSense and intelligent equipment biological electromagnetism and its applications and
insulation and discharge computation for power equipment Given its scope the book benefits all researchers engineers and
graduate students who want to learn about cutting edge advances in Electrical Engineering **Model-Reference Robust
Tuning of PID Controllers** Victor M. Alfaro,Ramon Vilanova,2016-04-16 This book presents a unified methodology for the
design of PID controllers that encompasses the wide range of different dynamics to be found in industrial processes This is
extended to provide a coherent way of dealing with the tuning of PID controllers The particular method at the core of the
book is the so called model reference robust tuning MoReRT developed by the authors MoReRT constitutes a novel and
powerful way of thinking of a robust design and taking into account the usual design trade offs encountered in any control
design problem The book starts by presenting the different two degree of freedom PID control algorithm variations and their
conversion relations as well as the indexes used for performance robustness and fragility evaluation the bases of the
proposed model Secondly the MoReRT design methodology and normalized controlled process models and controllers used in
the design are described in order to facilitate the formulation of the different design problems and subsequent derivation of
tuning rules Inlater chapters the application of MoReRT to over damped inverse response integrating and unstable processes
is described The book ends by presenting three possible extensions of the MoReRT methodology thereby opening the door to

new research developments In this way the book serves as a reference and source book for academic researchers who may also consider it as a stimulus for new ideas as well as for industrial practitioners and manufacturers of control systems who will find appropriate advanced solutions to many application problems

Information Systems Architecture and Technology: Proceedings of 40th Anniversary International Conference on Information Systems Architecture and Technology - ISAT 2019 Jerzy Świątek, Leszek Borzowski, Zofia Wilimowska, 2019-09-04 This three volume book highlights significant advances in the development of new information systems technologies and architectures Further it helps readers solve specific research and analytical problems and glean useful knowledge and business value from data Each chapter provides an analysis of a specific technical problem followed by a numerical analysis simulation and implementation of the solution to the real world problem Managing an organization especially in today's rapidly changing environment is a highly complex process Increased competition in the marketplace especially as a result of the massive and successful entry of foreign businesses into domestic markets changes in consumer behaviour and broader access to new technologies and information calls for organisational restructuring and the introduction and modification of management methods using the latest scientific advances This situation has prompted various decision making bodies to introduce computer modelling of organization management systems This book presents the peer reviewed proceedings of the 40th Anniversary International Conference Information Systems Architecture and Technology ISAT held on September 15-17 2019 in Wrocław Poland The conference was organised by the Computer Science Department Faculty of Computer Science and Management Wrocław University of Sciences and Technology and University of Applied Sciences in Nysa Poland The papers have been grouped into three major sections Part I discusses topics including but not limited to artificial intelligence methods knowledge discovery and data mining big data knowledge based management Internet of Things cloud computing and high performance computing distributed computer systems content delivery networks and service oriented computing Part II addresses various topics such as system modelling for control recognition and decision support mathematical modelling in computer system design service oriented systems and cloud computing and complex process modelling Part III focuses on a number of themes like knowledge based management modelling of financial and investment decisions modelling of managerial decisions production systems management and maintenance risk management small business management and theories and models of innovation
