# Simple Machines

by Sandra Lee

We use simple machines every day. They help us lift, pull, transport, and hold objects together. Without these very basic machines our lives would be much harder.

## Amp Up Your Ramp - Inclined Plane

Imagine trying to carry a heavy box up a ladder. It would probably be difficult and perhaps even dangerous. But if you were to place a long sheet of plywood on the ladder and push the box up, it would take less effort and energy.

You can see people using inclined planes, or ramps, all the time in their daily lives. Have you ever seen a delivery truck with a hydraulic ramp? These ramps, sometimes powered by hydraulic systems, are used to load and unload heavy items.

## Get the 'Wedge' Edge

What has at least one slanting side and ends in a sharp edge? A wedge. A wedge is similar to a ramp, but instead of moving an object from here to there, it pushes it apart. The narrower the wedge is, the easier it is to divide something.

Wedges can be sharp like axes, knives, or shovels. They can also be round, like the tip of a nail or the lines of a fork. Just imagine how difficult it would be to eat dinner without the help of knives and forks to cut and pick up your food.
