Similarities Between Nfsas And Student Loans:

Fees Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt. FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top down leadership system of university management and its double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance. University managements while on one level amenable to change have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt.

Social Justice and Education in the 21st Century Willie Pearson Jr., Vijay Reddy, 2021-04-10 The world is not an equal place. There are high and low income countries and high and low income households. For each group there are differential educational opportunities leading to differential educational outcomes and differential labor market opportunities. This pattern often reproduces the privileges and inequalities of groups in a society. This book explores this differentiation in education from a social justice lens. Comparing the United States and South Africa, this book analyzes each country's developmental thinking on education from human capital and human rights approaches in both primary and higher education. The enclosed contributions draw from different disciplines including legal studies, sociology, psychology, computer science and public policy.

The Next Twenty-five Years David Lee Featherman, Marvin Krislov, Martin Hall, 2009-12-18 A must read for anyone who cares about the future of higher education in diverse democracies.

Let's Talk About Varsity, 2009 **Quality and Inclusion in Education** N.V. Varghese, Anjana Mangalagiri, A. Mathew, 2023-05-12 This book calls for an equitable and qualitative access to education for all. It proposes paradigms of educational governance that are based on coalition building between key stakeholders are grounded in local and cultural contexts sensitive to the language needs of communities. It underlines the significance of gender sensitive and inclusive approaches that ensure equity for marginalized children and minorities. Based on research based studies, the volume focuses on equity, quality and learning covering a broad spectrum from school to higher to adult education. It discusses the multiple learner deprivations amongst the marginalized communities and the severe impact of

events such as pandemics that exacerbate learner inequities and the recent developments in India under the National Education Policy 2020. It also presents research based country experiences in the Asian India Bangladesh China and African Ghana South Africa contexts showing how external influences on the changing priorities in policy perspectives cut across developing countries. Compiled in honour of Professor R Govinda this volume of insightful articles will be of interest to students and researchers of educational policy and studies sociology of education equity and human rights. Governance and the postcolony David Everatt, 2019-08-01. Civil society NGOs governments and multilateral institutions all repeatedly call for improved or good governance yet they seem to speak past one another. Governance is in danger of losing all meaning precisely because it means many things to different people in varied locations. This is especially true in sub Saharan Africa. Here the postcolony takes many forms reflecting the imperial project with painful accuracy. Offering a set of multidisciplinary analyses of governance in different sectors crisis management water food security universities in different locales across sub Saharan Africa and from different theoretical approaches network to adversarial network governance this volume makes a useful addition to the growing debates on how to govern. It steers away

from offering a correct definition of governance or from promoting a particular position on postcoloniality It gives no neat conclusion but invites readers to draw their own conclusions based on these differing approaches to and analyses of governance in the postcolony As a robust critical assessment of power and accountability in the sub Saharan context Governance and the Postcolony Views from Africa brings together topical case studies that will be a valuable resource for those working in the field of African international relations public policy public management and administration National Plan for Higher Education South Africa. Student Debt and the Siren Song of Systemic Risk Jonathan Glater, 2015 This Article analyzes the dangerous effects of restricting federal student aid which aims to expand college access in response to fear of a student loan bubble that could cause a future financial crisis Scholars and pundits have suggested that increases in student debt resemble the expansion of mortgage borrowing in the years before the 2008 financial crisis and that higher default rates on student loans contribute to risk of a similar financial calamity in the future The Article identifies the analogy s potentially pernicious effects given the popular narratives attached to mortgage borrowers who defaulted on their debts in the period leading up to and following the financial crisis Critics of government policies that made homeownership more accessible to poor and minority buyers blamed borrowers whom they characterized as greedy and foolish Applying such reasoning to student debt would imply that access to education loans should be limited a development utterly at odds with the purpose of the Higher Education Act of 1965 Thus those likening student loans to home loans sing a siren song that could mislead lawmakers who for decades have sought to use federal aid to make higher education more accessible regardless of students financial resources Further the Article s analysis shows that student loans and home loans differ in ways that make it unlikely that defaults could contribute to a crisis [Can Student Loans Improve Accessibility to Higher Education and Student Performance? An Impact Study of the Case of Sofes, Mexico](#) Erik J.F. Canton, 2016 Financial aid to students in tertiary education can contribute to human capital accumulation through two channels increased enrollment and improved student performance Canton and Blom analyze the quantitative importance of both channels in the context of a student loan program SOFES implemented at private universities in Mexico With regard to the first channel enrollment results from the Mexican household survey indicate that

financial support has a strong positive effect on university enrollment. Given completion of upper secondary education, the probability of entering higher education rises 24 percent. The authors use two data sources to investigate the second channel: student performance. They analyze administrative data provided by SOFES using a regression discontinuity design, and survey data enable them to perform a similar analysis using a different control group. Empirical results suggest that SOFES recipients show better academic performance than students without a credit from SOFES. However, the results cannot be interpreted as a purely causal impact of the student loan program since the impacts also could reflect self-selection of students. This paper, a product of the Human Development Sector Unit, Latin America and the Caribbean Region, is part of a larger effort in the region to measure and evaluate the impact of the unit's programs.
