Knowledge Beyond Colour Lines Monwabisi K. Ralarala, Salochana Lorraine Hassan, Rajani Naidoo, 2021-05-25. Knowledge remains timely in education. The need for academics to contemplate its relevance, worth, use, and everything in between deems a continuous intellectual project rather than a conundrum to be solved. This book takes the South African context by the horns as it challenges the often dormant and traditionalist ways in which higher education spaces see knowledge. Through original research and the voices of academics and students, this book argues for repurposing knowledge generation, knowledge sharing, and critical pedagogy so that more inclusive teaching and learning environments can be both imagined and sustained. The contentious tensionalities that this creates for LoLT and SoTL in particular are unlocked so as to trouble the South African higher education landscape with the intent to proffer alternative pathways for a knowledge beyond colour lines. Prof. Shan Simmonds, PhD, NWU. This edited volume bristles with fresh scholarly approaches and insights of an emergent generation of engaged scholars grappling with the issues and problems of higher education in South Africa. The issues dealt with here are varied and encompassing. They are treated with intellectual delicacy and probing sensitivity, articulacy, informed data, and bold conclusions. They serve well.

Choice Architecture Versus Price Xiaoling Ang, 2016. We show that changes in choice architecture have a large effect on student loan decisions, while we do not find significant effects of sizeable interest rate changes. We evaluate the effect of two policies implemented in 2010 by the U.S. Department of Education: 1) the requirement that all applicants for private student loans fill out a Self-Certification Form which includes various disclosures about federal aid, and 2) the prohibition of presenting a private student loan as a default option on a financial aid offer without disclosure of the relationship between the school and the creditor. Using difference and difference-in-differences and matching techniques on a proprietary dataset of private student loan originations from the Consumer Financial Protection Bureau and survey and administrative data from the Department of Education, we show that these changes decreased private student loan originations by 33% at public four-year institutions, 18% at private not-for-profit four-year institutions, and 55% at for-profit institutions. In contrast, we find no consumer response when analyzing a 60 basis point decrease in the price of federal Parental PLUS loans at some schools using the same datasets and similar estimation techniques.
