Physical Education Technology Playbook Darla M. Castelli, Leah Fiorentino, 2008 It is widely accepted that the increasing use of technology such as TV and computers has led to a reduction in physical activity. But in *Physical Education Technology Playbook* authors Darla Castelli and Leah Holland Fiorentino show you how to use technology to increase physical activity and enhance learning about health and fitness. This book comes with detailed instructions and examples so you can easily incorporate the described technologies into your teaching. From cover

Teaching with Educational Technology in the 21st Century: The Case of the Asia-Pacific Region Inoue, Yukiko, Bell, Suzanne, 2005-12-31 With the emphasis on faculty experiences and efforts to enhance higher learning in less developed regions. *Teaching with Educational Technology in the 21st Century: The Case of the Asia Pacific Region* is a comprehensive study of teaching applications involving educational technology. The book encourages collaboration across geographical borders to promote information literacy, facilitate the learning process, and to establish a greater infusion of technology throughout the region. Intended as a guide, *Teaching with Educational Technology in the 21st Century: The Case of the Asia Pacific Region* looks clearly at the impact of distance education programs, articulation issues, faculty technical competency levels, and offers solutions for policy makers and educators to remain current with basic technical applications. It explains how education is no longer confined to a geographical space and reaches out as a model to all interested in promoting quality higher education across geographical and cultural borders.

Children, Dogs and Education Mary Renck Jalongo, 2018-05-08 This book brings together authoritative information about the child dog bond as it is manifested with family dogs, visiting therapy dogs, and service dogs trained to assist children with disabilities. Despite the widely accepted view that participating in a dog's care and interacting with dogs in behaviorally healthy ways is a route to becoming responsible and compassionate, research on this complex dynamic is difficult to design, time consuming to collect, and challenging to analyze. This volume synthesizes theory, research, and practice, bringing all to bear upon child dog interactions in homes, schools, libraries, and the community at large. *Children, Dogs and Education* serves as a handbook for a diverse group of adults who seek to build positive relationships between children and dogs: parents, families, professional dog trainers, teachers, librarians, mental health professionals, health care professionals, and university faculty. The study of interactions between human and nonhuman animals has captured the imagination of an international community of researchers from many different fields and professions. Even though dogs are ubiquitous in the lives of most children, studies of children's interactions with dogs in families and communities are lacking. Most of the previous research on the human-canine bond has focused on adolescents and adults, or even when younger children are the focus, it has tended to rely on parents to speak for children. There are three features of this book that make it unique. First, it goes beyond exploring the child dog bond to examine additional important issues, including children's concepts of responsible care, their ability to interpret dogs' behavioral cues, and their ideas about canine behavioral issues, training,

Second unlike most other work to date it represents children's voices through cases interviews and drawings Finally the contributors to this edited work use their collective wisdom to draw educational implications and suggest direction in preparing the next generation of dog guardians **School Library Journal** ,2009 Handbook of Research on Hybrid Learning Models: Advanced Tools, Technologies, and Applications Wang, Fu Lee,Fong, Joseph,Kwan, Reggie,2009-12-31 This book focuses on Hybrid Learning as a way to compensate for the shortcomings of traditional face to face teaching distance learning and technology mediated learning Provided by publisher *Help!
