Model Driven Engineering Languages and Systems Andy Schürr, Bran V. Selic, 2009-09-30 The pioneering organizers of the rst UML workshop in

Mulhouse France in the summer of 1998 could hardly have anticipated that in little over a decade their initiative would blossom into today's highly successful MODELS conference series, the premier annual gathering of researchers and practitioners focusing on a very important new technical discipline: model-based software and system engineering. This expansion is of course a direct consequence of the growing significance and success of model-based methods in practice. The conferences have contributed greatly to the heightened interest in the field, attracting much young talent and leading to the gradual emergence of its corresponding scientific and engineering foundations. The proceedings from the MODELS conferences are one of the primary references for anyone interested in a more substantive study of the domain. The 12th conference took place in Denver in the USA, October 4-9, 2009, along with numerous satellite workshops and tutorials as well as several other related scientific gatherings. The conference was exceptionally fortunate to have three eminent invited keynote speakers from industry: Stephen Mellor, Larry Constantine, and Grady Booch.

New Trends in Software Methodologies, Tools and Techniques Hamido Fujita, 2010. Contains 30 papers from the SoMeT_10 international conference on new trends in software methodology, tools, and techniques in Yokohama, Japan. This book offers an opportunity for the software science community to reflect on where they are and how they can work to achieve an optimally harmonized performance between the design tool and the end user.
