prescriptions harmonic noise and relativistic Brownian motion Connection between the Langevin equation and Tsallis distribution is also discussed Due to the growing interest in the research on the generalized Langevin equations several of them are presented They are described with some details Recent research on the integro differential Fokker Planck equation derived from the continuous time random walk model shows that the topic has several aspects to be explored This equation is worked analytically for the linear force and the generic waiting time probability distribution function Moreover generalized Klein Kramers equations are also presented and discussed They have the potential to be applied to natural systems such as biological systems
