It is a simple and efficient way of predicting the intelligence quotient of a person. It is based on the assumption that if there is a simple and efficient way of doing things in life, we don't look outside the box when the solution is right inside the box. No complex formula is needed by teachers, psychometrists, and laymen to measure and assess people's intelligence. The IQA is meant to predict the Approximation of IQ of students/people based on the Standardized Tests they have taken using the IQA formula.
