Williams, this fundamental work explains how to choose significant topics, pose genuine and productive questions, find and evaluate sources, build sound and compelling arguments, and convey those arguments effectively to others. While preserving the book's proven approach to the research process as well as its general structure and accessible voice, this new edition acknowledges the many ways research is conducted and communicated today. FitzGerald, it recognizes that research may lead to a product other than a paper or no product at all and includes a new chapter about effective presentations. It features fresh examples from a variety of fields that will appeal to today's students and other readers. It also accounts for new technologies used in research and offers basic guidelines for the appropriate use of generative AI.
