Advanced Intelligent Pipeline Management Technology Huai Su, Qi Liao, Haoran Zhang, Enrico Zio, 2023-12-12 This book summarizes the advanced intelligent pipeline management technologies. The text discusses the main challenges of how to define and reinvent data driven intelligent pipeline systems by studying scheduling operation safety management systems. Additionally, within an all around intelligent pipeline system technology development framework, this book characterizes the scientific problems of intelligent pipeline system services among different processes such as scheduling demand side management operation condition monitoring safety analysis fault detection etc. This book also introduces the existing positive and successful intelligent pipeline system projects that can be identified in the studied domain and how can they be best applied for practical success. The text is supported by informative illustrations and case studies so that practitioners can use the book as a toolbox to improve understanding in applying the novel technologies into intelligent pipeline system management and development.

Energy and Sustainability V: Special Contributions C.A. Brebbia, S.S. Zubir, 2015-03-19 This volume contains special contributions presented at the 5th International Conference on Energy and Sustainability held by the Wessex Institute of Technology. It is a companion to the Volume containing most of the contributions Vol 186 of WIT Transactions on Ecology and the Environment and comprises papers presented orally during the Conference. The modern world is highly dependent on the exploitation of fossil fuels. More recently, resources depletion and severe environmental effects deriving from the continuous use of these fuels has resulted in an increasing amount of interest in renewable energy resources and the search for sustainable energy policies. The changes required to progress from an economy mainly based on hydrocarbons to one taking advantage of sustainable energy resources are massive and require considerable scientific research as well as engineering systems. The effect also involves collaboration between different disciplines in order to arrive at optimum solutions including buildings energy networks convenience systems new energy storage solutions waste to energy technologies and many others. This book along with its companion volume covers topics related to sustainability in energy and power production storage distribution and management. These include Energy Policies Renewable Energy Resources Sustainable Energy Production Environmental Risk Management Green Buildings Energy Storage Biofuels Processing of Oil and Gas Drilling and Well Design CO₂ Capture and Management Pipelines Energy Efficiency Energy from Waste Energy and Transportation.
