Polymers and Two-Dimensional Nanocomposites Rotimi Sadiku, Yskandar Hamam, Suprakas Sinha Ray, Oladipo Folorunso, 2024-11-23 Polymers and Two Dimensional Nanocomposites provides a detailed review of recent progress in this important research field. The chapters cover new developments in synthesis methods, fabrication techniques, sample preparation methods, surface modification, characterization methods of enhancing the properties of these materials and industrial applications in energy, environmental, oil and gas, sensors, corrosion, biomedical and structural applications. The book provides a valuable reference resource for academic and industrial researchers, materials scientists and engineers working in the fields of polymer science and engineering, polymer composites and nanocomposites. Covers recent developments in synthesis, characterization, properties and applications. Discusses new fabrication techniques and how to select the right processing conditions. Systematic presentation of theoretical and experimental investigation of properties for various industrial applications. Attention is given to current challenges and future improvements. Augmented Reality and Its Application Dragan Cvetković, 2022-03-16 Augmented Reality (AR) is a discipline that includes the interactive experience of a real world environment in which real world objects and elements are enhanced using computer perceptual information. It has many potential applications in education, medicine and engineering among other fields. This book explores these potential uses presenting case studies and investigations of AR for vocational training, emergency response, interior design, architecture and much more. **The A to Z of Careers in South Africa**, 2006 Research Anthology on Military and Defense Applications, Utilization, Education, and Ethics Management Association, Information Resources, 2021-05-28 Military technology is highly advanced in terms of technology being used in the field, computer applications, artificial intelligence and software applications. These high performance technologies range from weapons to communications technology to automation in vehicles and weaponry. These technologies must be both secure and reliable in harsh environments. Research is being focused specifically on that including how military and defense applications operate, what modern technologies are being used and the ethics surrounding these applications. A holistic view of these applications is necessary for both understanding current military tactics and tools along with the future applications. The Research Anthology on Military and Defense Applications, Utilization, Education and Ethics focuses specifically on military and defense operations, expenditure, technologies and tools and the ethics surrounding technologies like weaponry and artificial intelligence in the military. The chapters cover a wide and diverse range of military and defense applications while providing crucial information on the functions, security and reliability of these technologies. Beyond an understanding of the applications themselves, this book also focuses on military education surrounding these technologies and the ethics of usage to provide a well rounded understanding of research in the field. This book is ideal for military consultants, military personnel, defense agencies, national security agencies, government officials, defense personnel, policymakers, military educators and trainers, stakeholders.
