Data graphics are used extensively to present information Understanding graphics is a lot about understanding the data represented by the graphics having a feel not just for the numbers themselves the reliability and uncertainty associated with them but also for what they mean This book presents a practical approach to data visualisation with real applications front and centre The first part of the book is a series of case studies each describing a graphical analysis of a real dataset The second part pulls together ideas from the case studies and provides an overview of the main factors affecting understanding graphics Key Features Explains how to get insights from graphics Emphasises the value of drawing many graphics Underlines the importance for analysis of background knowledge and context Readers may be data scientists statisticians or people who want to become more visually literate A knowledge of Statistics is not required just an interest in data graphics and some experience of working with data It will help if the reader knows something of basic graphic forms such as bar charts histograms and scatterplots **Managing eBook Metadata in Academic Libraries** Donna E

Frederick, 2016-01-07 Managing ebook Metadata in Academic Libraries Taming the Tiger tackles the topic of ebooks in academic libraries a trend that has been welcomed by students faculty researchers and library staff However at the same time the reality of acquiring ebooks making them discoverable and managing them presents library staff with many new challenges Traditional methods of cataloging and managing library resources are no longer relevant where the purchasing of ebooks in packages and demand driven acquisitions are the predominant models for acquiring new content Most academic libraries have a complex metadata environment wherein multiple systems draw upon the same metadata for different purposes This complexity makes the need for standards based interoperable metadata more important than ever In addition to complexity the nature of the metadata environment itself typically varies slightly from library to library making it difficult to recommend a single set of practices and procedures which would be relevant to and effective in all academic libraries Considering all of these factors together it is not surprising when academic libraries find it difficult to create and manage the metadata for their ebook collections This book is written as a guide for metadata librarians other technical services librarians and ancillary library staff who manage ebook collections to help them understand the requirements for ebook metadata in their specific library context to create a vision for ebook metadata management and to develop a plan which addresses the relevant issues in metadata management at all stages of the lifecycle of ebooks in academic libraries from selection to deselection or preservation Explores the reasons behind creating records for our resources and challenges libraries to think about what that means for their context Discusses the complex nature of academic libraries and the electronic resources they require Encourages librarians to find their own way to manage metadata **Consumer Reports** Consumer
