Technique Civilisation Mumford Lewis:

Technics and Civilization Lewis Mumford, 2010-10-30 *Technics and Civilization* first presented its compelling history of the machine and critical study of its effects on civilization in 1934 before television the personal computer and the Internet even appeared on our periphery Drawing upon art science philosophy and the history of culture Lewis Mumford explained the origin of the machine age and traced its social results asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution Mumford sagely argued that it was the moral economic and political choices we made not the machines that we used that determined our then industrially driven economy Equal parts powerful history and polemic criticism *Technics and Civilization* was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years and to predict the pull the technological still holds over us today The questions posed in the first paragraph of *Technics and Civilization* still deserve our attention nearly three quarters of a century after they were written *Journal of Technology and Culture* Samuel Johnson's *Pragmatism and Imagination* Stefka Ritchie, 2018-11-07 The central theme of this book is an under studied link between the canon of Francis Bacon's and Isaac Newton's scientific and philosophical thought and Samuel Johnson's critical approach that can be traced in a textual study of his literary works The interpretive framework adopted here encourages familiarity with the history and philosophy of science confirming that the history of ideas is an entirely human construct that constitutes an integral part of intellectual history This further endorses the argument that intermediality can only be of benefit to future research into the richness of Johnson's literary style As perceived boundaries are crossed between conventionally distinct communication media the profile of Johnson that emerges is of a writer of passionate intelligence who was able to combine a pragmatic approach to knowledge with flights of imagination as a true artist *Decolonization Agonistics in Postcolonial Fiction C.* Okonkwo, 1999-05-10 This book explores through theory and in depth textual criticism how novelists from formerly colonised societies have exploited indigenous codes and conventions of aesthetic representation to transform the novel into an effective medium for cultural and political resistance to neo colonialism Concentrating on novels written between the late 1940s and early 1990s in Africa Polynesia and the West Indies it offers a fresh mode of postcolonial critique which takes account of the ideological impulses behind the novelists interpretation of the colonial experience *History of Techniques: Techniques and civilizations* Bertrand Gille, 1986 **Catalogue of the Library of the National Gallery of Canada** National Gallery of Canada. Library, 1973 *Mass Communication and American Social Thought* John Durham Peters, Peter Simonson, 2004-08-03 This anthology of hard to find primary documents provides a solid overview of the foundations of American media studies Focusing on mass communication and society and how this research fits into larger patterns of social thought this valuable collection features key texts covering the media studies traditions of the Chicago school the effects tradition the critical theory of the Frankfurt school and mass society theory Where possible articles are reproduced in their

entirety to preserve the historical flavor and texture of the original works Topics include popular theater yellow journalism cinema books public relations political and military propaganda advertising opinion polling photography the avant garde popular magazines comics the urban press radio drama soap opera popular music and television drama and news This text is ideal for upper level courses in mass communication and media theory media and society mass communication effects and mass media history

Theology and Technique Jacques Ellul, 2024-02-21 Theology and Technique is a posthumous incomplete volume drafted in the 1970s that nevertheless constitutes a significant addition to the Ellul corpus Working from Jacques Ellul's original outline a collaborative team including three of Ellul's children a grandson and Ellul scholars has assembled previous partial publications that Ellul himself approved for eventual incorporation along with relevant unpublished essays and notes into a book which throws the relationship between Ellul's radical theology and sociological critique into fresh perspective Frederic Rognon contributes an especially insightful general introduction The translation by Christian Roy is a model of rendering the complexities of the French original into English This latest Ellul publication will be essential to any serious attempt to appreciate the scope and depth of Ellul's Christian engagement with the challenges of the contemporary world

The Information Society: Evolving Landscapes Jacques Berleur, Andrew Clement, Richard Sizer, Diane Whitehouse, 2013-11-11 UR Reader consists of a set of essays written by international authors many 0 of whom are acknowledged experts in one or more aspects of information technology IT and its implications for society The contents have been influenced by the fact that the relationship between IT and society has to be considered in an holistic context Our purpose has been to present this series of essays in the loosely related perspectives of landscapes which reflect that holism As editors we have chosen to leave people free to select the different perspectives and traverse the landscapes in any manner they choose The Reader seeks to raise social awareness of the issues at stake when we talk 1 about computers and social accountability and aims to encourage wider discussion of the issues involved It has a normative set of aims and indicates a determination to explore a possible reshaping and restructuring of information technology according to human needs In an Epilogue new pointers are given for action In what follows we describe the rationale behind The Information Society Evolving Landscapes we move from the conference held at the University of Namur in June 1988 which shaped the perspectives then on to the various routes by which the landscapes can be traversed

Menuhin Sir Humphrey Burton, 2016-12-19 Since 2000 when this biography was first published Menuhin's name has not faded from public attention as often happens in the decades after the death of a popular performing artist Far from it the centenary of his birth April 22 1916 is being marked by celebrations around the world Yehudi Menuhin was born in New York of Russian Jewish immigrants Prodigiously gifted the Miracle Boy gave his first solo recital aged eight and within five years was world famous Menuhin was a visionary

individualist who didn't mind shocking the establishment. His post-war support for the conductor Wilhelm Furtwängler and his determination to build bridges with the defeated German nation brought him into sharp conflict with the Jewish establishment and DPs in Berlin. Later he spoke out against apartheid in South Africa and denounced the Soviet Union's oppressive policy towards writers and dissidents. Drawing on contemporary sources, unpublished family correspondence and radio interviews, Burton creates a compelling portrait of an extraordinary human being, one of the best-loved classical musicians of the twentieth century. *Gandhian Thought and Techniques in the Modern World* S. C. Gangal, 1988

Technics and Civilization Lewis Mumford, 1965 *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office, 1965 Includes Part 1 Number 2 Books and Pamphlets Including Serials and Contributions to Periodicals July December **Technological Change** Robert Fox, 1996 *Technological Change* gathers together examples of the best current thinking on methodology and the theoretical perspectives that are increasingly of concern to historians of technology whilst at the same time presenting other papers which reflect the state of the art in key areas of historical debate. The volume emphasises the need both to establish a common forum for theoretical and empirical research and also to delineate the shared concerns of these two treatments which are too often reflected as conflicting rather than mutually supportive approaches to the writing of the history of technology. *Key Thinkers for the Information Society* Christopher May, 2003 *Key Thinkers for the Information Society* provides an introduction to some important social theorists whose work has considerable relevance to today's brave new world of information and communication technologies. With the aim of widening current perspectives on the information society, each contributor introduces a particular theorist and discusses the way in which their insights can be reintroduced into debates regarding the social, political and cultural impact of ICTs. Theorists presented in Volume 1 include some well-known and some less well-known figures: Walter Benjamin, Murray Edelman, Jacques Ellul, Harold Innes, Lewis Mumford, Karl Polanyi, Eric Elmer Scattachneider and Raymond Williams. Each has something fresh and pertinent to say and taken as a whole, this volume provides an exciting new resource for contemporary studies. *A-Z Guide to Modern Social and Political Theorists* Professor Stuart Sim, Noel Parker, 2014-06-03 *The A-Z Guide to Modern Social and Political Theorists* is a companion volume to the already published *A-Z Guide to Modern Literary and Cultural Theorists*. It ranges widely through the social sciences and related areas to identify thinkers who have had a major impact on the development of modern social and political theory and given clear, accessible summaries of their work. While the accent is on the later twentieth century, several up-and-coming theorists are included to ensure a contemporary edge to the volume. Classic names in the field from the earlier twentieth century are not neglected and the collection also delves back into the nineteenth century for such founding figures of the social sciences as Marx and Comte. The volume is therefore both up-to-date and mindful of the sources of modern debates. **Cognitive Prosthetics** Maxime Derian, 2018-11-22

Computerized machines can be found in many forms and all around us in our pockets and even sometimes in our body. For

many of us they are now essential elements of everyday life When it comes to smartphones connected objects medical digital devices and e health these digital tools have proliferated in our environment continually transforming our modes of social organization They act as prostheses and orthotics that enhance our cognitive capacities and influence our inherent behaviors Are digital tools that perpetually envelop the body and the spirit able to overwhelm the social order Could our cognitive prosthetics lead to permanent radical change to our society which could become similar to a hive This book explores this reflection which is at the center of social research on digital tools Presents a complete review of the field of computerized human prosthetics Drawn from research conducted over 6 years and from 2 post doctoral surveys conducted at renowned institutions in France and Japan Sorbonne University CNRS Tokyo Institute of technology Provides an interdisciplinary approach combining anthropology sociology psychology and philosophy
