Optimizing Play Christopher A. Paul, 2024-05-14 An unexpected take on how games work, what the stakes are for them, and how game designers can avoid the traps of optimization. The process of optimization in games seems like a good thing: who wouldn't want to find the most efficient way to play and win? As Christopher Paul argues in *Optimizing Play*, however, optimization can sometimes risk a tragedy of the commons, where actions that are good for individuals jeopardize the overall state of the game for everyone else. As he explains, players inadvertently limit play as they theorycraft, seeking optimal choices. The process of developing a meta, or the most effective tactic available, structures decision making, causing play to stagnate. A stale meta then creates a perception that a game is solved and may lead players to turn away from the game. Drawing on insights from game studies, rhetoric, the history of science, ecology, and game theory literature, Paul explores the problem of optimization in a range of video games, including *Overwatch*, *FIFA EA Sports FC*, *NBA 2K*, *Clash Royale*, *World of Warcraft*, and *League of Legends*. He also pulls extensively from data analytics in sports, where the problem has progressed further and is even more intractable than it is in video games, given the money sports teams invest to find an edge. Finally, Paul offers concrete and specific

suggestions for how games can be developed to avoid the trap set by optimization run amok *Theory, Development, and Strategy in Transmedia Storytelling* Renira Rampazzo Gambarato, Geane Carvalho Alzamora, Lorena Tárzia, 2020-05-17 This book explores transmedia dynamics in various facets of fiction and nonfiction transmedia studies Moving beyond the presentation definition of transmediality as a field of study the authors examine novel advancements in the theory methodological development and strategic planning of transmedia storytelling Drawing upon a theoretical foundation grounded in Peircean semiotics and reflected in the methodological approaches to fiction and nonfiction transmedia projects the chapters delve into diverse case studies such as *The Handmaid's Tale* and mega sporting events like the Olympics and FIFA World Cup that illustrate the applications of our own methods and the implications of the logic behind transmedia dynamics Expanding upon their own scholarship the authors tackle the relevant topic of transmedia journalism and present new approaches to transmedia strategic planning around educational initiatives in developing countries The book is an important reference for scholars and students of media studies education journalism and transmedia and those interested in comprehending theory methodological development and strategic planning of transmediality **Routledge Handbook of Football Studies** John Hughson, Kevin Moore, Ramón Spaaij, Joseph Maguire, 2016-10-04 Football is unquestionably the world's most popular and influential sport There is no corner of the globe in which the game is not played or followed More countries are affiliated to FIFA football's governing body than to the United Nations The sport has therefore become an important component of our social cultural political and economic life The Routledge Handbook of Football Studies is a landmark work of reference going further than any other book in considering the historical and contemporary significance of football around the world Written by a team of leading sport scholars the book covers a broad range of disciplines from history sociology politics and business to philosophy law and media studies The central section of the book examines key themes and issues in football studies such as the World Cup and international competition governance and ownership fandom and celebrity The concluding section offers in depth surveys of the culture and organisation of football in each of the regional confederations from UEFA to CONCACAF This book will be fascinating reading for any serious football fan and an essential resource for advanced students or scholars undertaking research in football or sport studies and any practitioner or policy maker working in football
