Template Mixing and Mastering Billy Decker, 2020-09-21 Audio production is an incredibly rewarding craft. To take the raw basic tracks of a fledgling idea and shape them into one glorious stereophonic sound wave is an amazing feat. The transformation from analogue to digital dominance has brought many advances in sound quality and new techniques, but producing digital music with only a standard computer and DAW can be problematic, time-consuming, and sometimes disappointing without the right approach and skills. In *Template Mixing and Mastering*, renowned mix engineer Billy Decker tackles the challenges of in-the-box production through his innovative template approach. He shares his passion and knowledge from over twenty years of industry experience, including an introduction to templates and a step-by-step guide to their set-up and a discussion of drum replacement technology. Channel and setting information for each of the drum instrument and vocal sections of his template is discussed along with the master channel and his methodology of mixing and mastering. Finally, he gives professional advice and best practice.
