Translation Universals Anna Mauranen, Pekka Kujamäki, 2004-01-01 Translation universals is one of the most intriguing and controversial topics in recent translation studies Can we discover general laws of translation independent of the particularities of individual translations Research into this is new serious empirical work only began in the late nineties The present volume offers the state of the art on the issue It includes theoretical discussion on alternative conceptualisations and new distinctions around the basic concepts Several papers test hypotheses on universals in the light of recent work in different languages and some suggest new ones emerging from empirical work over the last two to three years The book contributes to the search for generalities in translation the methodological solutions available and presents emerging evidence on the kinds of regularities that large scale research is bringing forth On a more practical level the applicability of the hypotheses and findings to translator education is as always a concern for translation studies

Terminology Translation in Chinese Contexts Saihong Li, William Hope, 2021-02-22 Terminology Translation in Chinese Contexts Theory and Practice investigates the theory and practice of terminology translation terminology management and scholarship within the distinctive milieu of Chinese and explores the complex relationship between terminology translation micro level and terminology management macro level This book outlines the contemporary challenges of terminology translation and terminology management within Chinese contexts in specialized fields including law the arts religion Chinese medicine and food products The volume also examines how the development and application of new technologies such as big data cloud computing and artificial intelligence have brought about major

changes in the language service industry Technology such as machine translation and computer assisted translation has spawned new challenges in terminology management practices and has facilitated their evolution in contexts of ever greater internationalization and globalization This book recontextualizes terminology translation and terminology management with a special focus on English Chinese translation It is hoped that the volume will enable and enhance dialogue between Chinese and Western scholars and professionals in the field All chapters have been written by specialists in the different subfields and have been peer reviewed by the editors

Translation, Translation Susan Petrilli, 2003 Translation Translation contributes to current debate on the question of translation dealt with in an interdisciplinary perspective with implications not only of a theoretical order but also of the didactic and the practical orders In the context of globalization the question of translation is fundamental for education and responds to new community needs with reference to Europe and more extensively to the international world In its most obvious sense translation concerns verbal texts and their relations among different languages However to remain within the sphere of verbal signs languages consist of a plurality of different languages that also relate to each other through translation processes Moreover translation occurs between verbal languages and nonverbal languages and among nonverbal languages without necessarily involving verbal languages Thus far the allusion is to translation processes within the sphere of anthroposemiosis But translation occurs among signs and the signs implicated are those of the semiotic sphere in its totality which are not exclusively signs of the linguistic verbal order Beyond anthroposemiosis translation is a fact of life and invests the entire biosphere or biosemiosphere as clearly evidenced by research in biosemiotics for where there is life there are signs and where there are signs or semiotic processes there is translation indeed semiotic processes are translation processes According to this approach reflection on translation obviously cannot be restricted to the domain of linguistics but must necessarily involve semiotics the general science or theory of signs In this theoretical framework essays have been included not only from major translation experts but also from researchers working in different areas in addition to semiotics and linguistics also philosophy literary criticism cultural studies gender studies biology and the medical sciences All scholars work on problems of translation in the light of their own special competencies and interests

Translation and Localization Project Management Keiran J. Dunne, Elena S. Dunne, 2011 Over the past three decades translation has evolved from a profession practiced largely by individuals to a cottage industry model and finally to a formally recognized industrial sector that is project based heavily outsourced and that encompasses a wide range of services in addition to translation As projects have grown in size scope and complexity and as project teams have become increasingly distributed across geographies time zones languages and cultures formalized project management has emerged as both a business requirement and a critical success factor for language service providers In recognition of these developments this volume examines the application of project management concepts tools and techniques to translation and localization projects The contributors are seasoned practitioners and scholars who offer insights into the central role of project

management in the language industry today and discuss best practice approaches to the adaptation of generic project management knowledge skills tools and techniques for translation and localization projects Insights Into Specialized Translation Maurizio Gotti,Susan Šarčević,2006 This volume focuses on specialist translation one of the areas of translation in greatest demand in our age of globalization The 16 chapters deal not only with the classical domains of science and technology law socio politics and medicine but also with lesser researched areas such as archeology geography nutrigenomics and others As a whole the book achieves a blend of theory and practice It addresses a variety of issues such as translation strategy based on text type and purpose intercultural transfer and quality assessment as well as textual and terminological issues in bilingual and multilingual settings including international organizations and the European Union Today translation competence presupposes multidisciplinary skills Whereas some chapters analyze the linguistic features of special purpose texts and their function in specialized communication others show how specialized translation has changed as a result of globalization and how advances in technology have altered terminology research and translation processing

Beyond Descriptive Translation Studies Anthony Pym, Miriam Shlesinger, Daniel Simeoni, 2008 To go beyond the work of a leading intellectual is rarely an unambiguous tribute However when Gideon Toury founded Descriptive Translation Studies as a research based discipline he laid down precisely that intellectual challenge not just to describe translation but to explain it through reference to wider relations That call offers at once a common base an open and multidirectional ambition and many good reasons for unambiguous tribute The authors brought together in this volume include key players in Translation Studies who have responded to Toury s challenge in one way or another Their diverse contributions address issues such as the sociology of translators contemporary changes in intercultural relations the fundamental problem of defining translations the nature of explanation and case studies including pseudotranslation in Renaissance Italy Sherlock Holmes in Turkey and the coffee and sugar economy in Brazil All acknowledge Translation Studies as a research based space for conceptual coherence and creativity all seek to explain as well as describe In this sense we believe that Toury s call has been answered beyond expectations

Decentering Translation Studies Judy Wakabayashi, Rita Kothari, 2009 This book foregrounds practices and discourses of translation in several non Western traditions Translation Studies currently reflects the historiography and concerns of Anglo American and European scholars overlooking the full richness of translational activities and diverse discourses The essays in this book which generally have a historical slant help push back the geographical and conceptual boundaries of the discipline They illustrate how distinctive historical social and philosophical contexts have shaped the ways in which translational acts are defined performed viewed encouraged or suppressed in different linguistic communities The volume has a particular focus on the multiple contexts of translation in India but also encompasses translation in Korea Japan and South Africa as well as representations of Sufism in different contexts

potential of conventional machine translation systems like METAL and of the statistically oriented translation memory
