Financing Higher Education Worldwide D. Bruce Johnstone, Pamela N. Marcucci, 2010-06-07 No issue in higher education is as salient or as controversial as finance As demand for higher education around the world grows so do the costs associated with it especially as governments shoulder less of the burden Tuition fees rise and student loan debt grows Who pays for these surging costs Who should pay D Bruce Johnstone and Pamela N Marcucci examine the universal phenomenon of cost sharing in higher education where financial responsibility shifts from governments and taxpayers to students and families They find that growing costs for education far outpace public revenue streams that once supported it Even with financial aid and scholarships defraying some of these costs students are responsible for a greater share of the cost of higher education Featuring comprehensive economic and policy data the authors international comparative approach shows how economically diverse countries all face similar cost sharing challenges So who should pay for higher education While cost sharing is both politically and ideologically debated Johnstone and Marcucci contend that for almost all countries it is imperative for the

The Dynamics of International Student Circulation in a Global Context ,2008-01-01 Student mobility is the most important factor in the internationalization of higher education In this book existing assumptions will be questioned that mobility is primarily South North and North North and that South South flows are rather marginal that the economic rationale has become so dominant that there are nearly no other motives to be found anymore and that the growing presence of national and international providers of higher education and opportunities for distance education reduce the need for international student mobility The dynamics of international student circulation will be analyzed on the basis of four countries Egypt India Indonesia and South Africa which are perceived to be primarily on the sending side of student mobility and Europe and the USA which are perceived to be primarily but not exclusively on the receiving side These case studies will be placed in the context of broader developments in the internationalization of higher education and related to definitions methodological issues and global data as used by UNESCO OECD and others This study has been undertaken by five scholars from different parts of the world in the context of the 2005 2006 New Century Scholars Programme Higher Education in the Twenty First Century of the Fulbright Programme The book will be of relevance for both researchers and practitioners on globalization and the internationalization of higher education

Cost-sharing and Accessibility in Higher Education: A Fairer Deal? Pedro N. Teixeira, D. Bruce Johnstone, Maria J. Rosa, Hans Vossensteyn, 2007-11-23 Higher education finances lie at the crossroads in many Western countries Hence worldwide the most common approach to the need for increasing revenue was to use some form or forms of cost sharing or the shift of some of the higher educational per student costs from governments and taxpayers to parents and students This raises several important challenges to higher education systems First there is the political and social controversy associated with most forms of cost sharing particularly with tuition fees Secondly there are important issues in terms of the broad context of social policy such as the role of families and students and the relationship that the state establishes with each of them Third there is the comparison of alternative instruments of cost sharing and the direct and indirect effects of each of them notably in terms of educational equality Overall underlying cost sharing debates are fundamental questions about social choice individual opportunities and the role of government in society
