Showcasing original research from leading golf scientists across the globe, it examines the fundamental science underpinning the game and demonstrates how it can be applied in practice to improve and develop players. Each chapter provides a definitive account of the current state of knowledge in a particular area of golf science, addressing the limitations of existing research, presenting new areas for development and discussing the implications for coaches, players, scientists and the wider golfing public. Truly international in scope, the variety of topics explored include biomechanics and equipment, skill learning and technology, performance development, psychological techniques for success, the golfing body. This is an essential reference for any student or researcher with an interest in the game or any coach or professional looking to improve their knowledge. **Golf** Joseph Tramontana Ph.D., 2021-05-07 Golf is geared toward golfers open to the idea of improving their game through hypnosis. Joseph Tramontana Ph.D., a clinical psychologist who specializes in clinical hypnosis, is an internationally known author and speaker on the subject. In simple language, he shares how to achieve golf goals using hypnotic techniques: create and develop a plan to get the results you want; identify behaviors and beliefs that are holding you back; gain precise control over your body. Throughout the book, Tramontana provides numerous case studies of athletes who have improved their game as a result of hypnosis. He also explains why almost anyone can be hypnotized. Tramontana's previous book on sports hypnosis was written for the hypnosis practitioner or sports psychologist, but this book is written specifically for golfers. You will learn methods to improve your game through mental training techniques. Child Trafficking in the EU Pete Fussey, Paddy Rawlinson, 2017-03-27 Drawing on empirical research conducted with police in the UK and Romania, *Child Trafficking in the EU* explores the way in which the who and how we police and protect as trafficker and trafficked is related to Western notions of innocence, guilt, childhood and of the status of deserving victim. This book progresses a new theoretical space by linking its analysis to sociologies of mobility, marginalisation and the pluralised rendering of criminalised and victimised others. This book explores core contextual themes surrounding the commission response to and origins of child trafficking and presents empirical research into the investigation of child trafficking within the EU, situating the authors' findings against broader social, cultural, political, policy and judicial contexts. The authors conclude with a synthesis of the key themes and arguments to situate pan-EU child trafficking within political, criminal justice, organisational, cultural and social contexts and consider the degree to which such criminality can be adequately addressed by current and emerging approaches given such enduring and persistent structural issues. This book will be of interest to scholars and students within the fields of criminology, sociology, political
