

1. Neutral the hand brake

The easiest way to move the vehicle from a parked position to a driving position is to use the hand brake. To ensure this you should use the hand brake in the middle of the vehicle seat area, or if the car has a central console, the gearshift will be in the middle of the console.

When manually downshifting, the vehicle will not move into the gear you require unless the footbrake is depressed and when downshifting you keep it depressed if necessary.

An "uphill start assist system" will also help prevent "stalling".

Roll-over device

The roll-over device gives protection in accidents when the vehicle's body is crushed down past the full front-end crumpling of the hood and engine compartment. The device is a roll-over device located in the transmission housing from the rear mainshaft gear.

⚠ WARNING

Be careful when using the roll-over device on slippery roads. Rapid acceleration may cause skidding.

Driving the Automatic transmission**Starting the engine**

The vehicle must be in **N (Neutral)** or **P (Park)** if one of the driving positions is engaged. Unless the vehicle is in one of these positions, the engine will not start.

Selecting a driving position**⚠ WARNING**

When the vehicle is in a driving position, the vehicle may move out of the parking position. Do not release the parking brake or foot brake until the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position.

1. If the engine must be running, release the parking brake only when the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position.

2. Do not accelerate while selecting a driving position. At the time the engine must run in all cases, the engine must run in all cases. The engine must run in all cases. The engine must run in all cases.

3. If the vehicle is in a driving position, the vehicle may move out of the parking position. Do not release the parking brake or foot brake until the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position.

4. Never shift into **R (Reverse)** or **P (Park)** when the vehicle is in motion.

**Putting off**

1. Put the vehicle in **P (Park)**. Release the parking brake. Do not release the parking brake until the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position.

Downshifting

Downshifting between forward gears is done by moving the gear selector to the next lower gear. Do not release the parking brake until the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position.

Shift to drive, road or low

Downshifting between forward gears is done by moving the gear selector to the next lower gear. Do not release the parking brake until the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position.

⚠ WARNING

When shifting to drive, road, or low, the vehicle may move out of the parking position. Do not release the parking brake until the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position.

Do not repeat "locking" both and lock both wheels spinning at high engine speed and lower throttle. In the vehicle design, the engine will not start in the vehicle's transmission and the engine will not start.

Parking

When **P (Park)** is selected, the vehicle is in a driving position. Do not release the parking brake until the vehicle is in a driving position. Release the parking brake only when the vehicle is in a driving position.

When the vehicle is in a driving position, the vehicle may move out of the parking position. Do not release the parking brake until the vehicle is in a driving position.

Before you move the vehicle from **P (Park)** to **R (Reverse)**, you must always apply the brake pedal before and while depressing the button in the middle of the selector lever.

When the vehicle is in a driving position, the vehicle may move out of the parking position. Do not release the parking brake until the vehicle is in a driving position.
