Climate Change and Disaster Risk Management Walter Leal Filho, 2012-08-10 There has been some degree of reluctance in the past to consider disaster risk management within the mainstream of adaptation to climate variability and climate change However there is now wide recognition of the need to incorporate disaster risk management concerns in dealing with such phenomena There is also a growing awareness of the necessity for a multi sectoral approach in managing the effects of climate variability and climate change since this can lead to a significant reduction of risk This book presents the latest findings from scientific research on climate variation climate change and their links with disaster risk management It showcases projects and other initiatives in this field that are being undertaken in both industrialised and developing countries by universities and scientific institutions government bodies national and international agencies NGOs and other stakeholders Finally it discusses current and future challenges identifying opportunities and highlighting the still unrealised potential for promoting better understanding of the connections between climate variation climate change and disaster risk management worldwide
