Southeast Asia's Geography

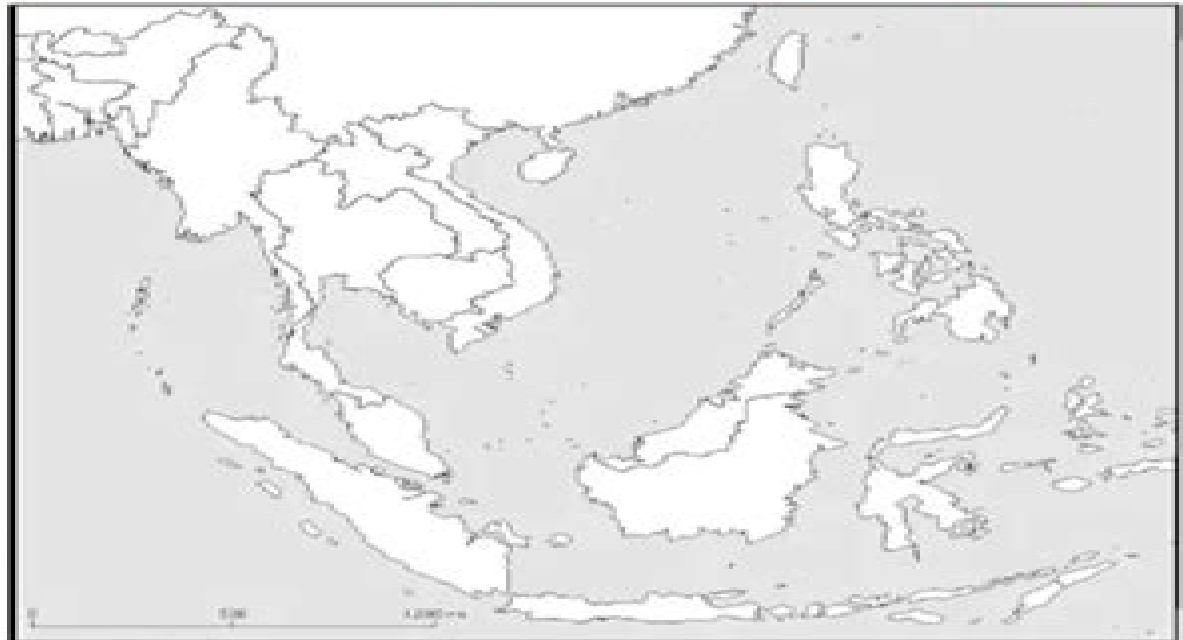

Southeast Asia is a region made up of mainland countries and inland nations located between the Indian Ocean and the Pacific Ocean. It includes Brunei, Cambodia, East Timor, Indonesia, Laos, Malaysia, Myanmar (Burma), the Philippines, Singapore, Thailand, and Vietnam. The region is known for its tropical rainforests, volcanoes, rivers, islands, and coastlines, as well as its rich cultural history and strategic location for trade.

Southeast Asia is divided into two major parts: the mainland and the islands. The mainland includes countries like Vietnam, Thailand, Cambodia, Laos, and Myanmar. This area has mountain ranges, river valleys, and fertile plains. Major rivers like the Mekong River and Irrawaddy River support farming and transportation.

The inland nations (Indonesia, the Philippines, East Timor, Brunei, and Singapore) are made up of thousands of islands, many of which are volcanic. The region lies along the Ring of Fire, where earthquakes and volcanic eruptions are common.

Southeast Asia has a tropical climate with warm temperatures and heavy rainfall throughout much of the year. The rainforests found here are home to many species of plants and animals, but deforestation has become a serious environmental issue.

Because of its location between India and China, Southeast Asia has long been a center of trade and cultural exchange. Its natural resources, such as rice, rubber, oil, and spices, have supported its economies and made it a valuable region for global trade. Coastlines and rivers have helped connect communities and supported fishing, farming, and transportation.

1. What are the two main parts of Southeast Asia, and how do they differ?
2. What is the Ring of Fire, and how does it affect Southeast Asia?
