1. **What is the main purpose of the study?**

- Abstract**—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and blood pressure (BP) of sedentary, middle-aged men. The subjects were divided into two groups: a control group and an exercise group. The exercise group performed a 10-week training program consisting of aerobic and resistance exercises. The control group did not exercise. HR and BP were measured at baseline and at the end of the 10-week period. The exercise group showed a significant decrease in both HR and BP compared to the control group. The results suggest that a 10-week training program can effectively reduce HR and BP in sedentary, middle-aged men.

Members didn't want all the political and economic power. They thought we were making a big mistake, saying that we had a right to self-determination.

- **Flows into the Caribbean from and to the U.S. Total:** Flows of over \$1 billion in foreign investments in the Caribbean from and to the U.S. are still largely in the hands of the U.S. private sector, but the U.S. government is also responsible for a significant portion of the flows. The U.S. government's role in the Caribbean is also significant in the area of foreign investment, and the U.S. government is also a significant player in the Caribbean. The U.S. government is also a significant player in the Caribbean. The U.S. government is also a significant player in the Caribbean.
