

Unit 14: Physiological Disorders and their care

Steven has Parkinson's, and lives at Sunplace Care home. He has a wife, two children and 5 grandchildren. Steven's health has deteriorated rapidly. He is struggling to sleep at night due to the constant tremors he feels in his hand and arms and the muscle cramps. Eventually, when he does sleep he wakes up to rigid and stiff muscles, this then makes personal hygiene in the morning difficult.

His tremors have got worse and he is struggling with daily tasks such as brushing his hair and making/drinking a cup of tea. This has also been exacerbated due to him not being able to balance properly. Recently he suffered a fall- and now will only walk short distances with a Zimmer frame. This has meant that he does not go out as often as he used to and would rather sit at the care home. Steven's memory has also declined and sometimes he does forget to take his medication or he is adamant that he has already taken it.

He is very close to his family but does feel that he has been a burden on them, particularly to his wife and two children. As his wife's health has deteriorated she has not been able to see him as much as she used too. Steven has been quite upset about this and often thinks that he is alone and 'nobody cares'. He sometimes gets very emotional about his disorder and can have some very low days. After seeing Steven, his two children do tend to get rather distressed and this then impacts on how much they see their Dad. Steven also has a good relationship with his grandchildren and loves to see them however this happens very rarely since being in the care home.

Steven used to be a performing arts teacher and used to love going to the theatre and watching plays. Since his disorder has worsened he is demotivated to go out and is also embarrassed of his tremor and speech. His speech is starting to become rather slow therefore he is now finding it difficult to communicate as easily as he used to.

In addition to his passion for the arts, Steven also enjoyed going to the Church and is very religious. He used to attend Church regularly with his wife and he found this a tranquil place where he could connect with himself and God. He has also made some good friends at Church and he finds going there allows him to socialise with the community and get involved with community projects. Again, since his Parkinson's has got worse he has not been able to attend Church as much as he wants to.

In this task, I will create a treatment plan which will work to improve the service users' health and well-being by assessing the user's needs and recommending actions to benefit them. I will show how this recommendation will be able to meet the needs of the service user and what the advantages and disadvantages of each recommendation could be and based on what works or doesn't how the plan could be changed.

P5: Assess the care needs of a selected service user with a physiological disorder.

In this task, I will assess the needs of selected users to create a plan which will help to create a care plan for the individual to help support them through their
