

THE CRYO SCREEN

This screen puts you in contact with your LIMBO-class Cryogenic Facility, where Agents are stored and surgically altered when inactive.

Agent Storage

When Agents are non-operational, standard EuroCorp practice is to keep them in deep-level Cryogenic suspension. You have been assigned your own LIMBO-class Cryogenic Facility to these ends. Initially, you will be in command of only one operational team of four Agents, so your usage of the Facility will be minimal. However, as more Agents are assigned to you, or the more Agents you "recruit" in the field, the more call there will be to use this resource.

If you want to swap an Agent in storage for one who is currently operational for whatever reason, the procedure is as follows. First, **left-click** on the relevant Agent number at the top of the screen (for example, click on 1 if Agent 1 is to be substituted). Now, **left-click** on the name of the Agent who is to take over the position, and the two Agents will swap places. This procedure can also be used to alter the hierarchy of an Agent team, which may come in useful for missions that call for your Agent team to work as two or more sub-teams.

Cybernetic Modification

Aside from Agent storage, the LIMBO Facility also has the capability to effect augmentative surgery, installing cybernetic implants into the bodies of Agents. Initially, only Level One Brain, Body, Leg and Arm augmentations are available, though as superior research filters through, more advanced options become available.

To have an Agent surgically modified, first select him by **left-clicking** on his Agent number. Now, **left-click** on the surgical modification you wish to implant him with. A diagram and details of the modification will appear in the window to the right of the screen, along with the cost of the modification. If you wish to proceed with the implantation, **left-click** on **Accept**, and the Facility auto-surgeon will carry out the operation immediately.

Note that you can **left-click** on the Modification's picture to receive a short text description about it.

Initially, the following modifications are available:

Body 1: For significantly increased survivability in hostile environments, encase an Agent's vital organs in triple-phase titanium alloy. An enhanced body modification provides the single biggest protection from punishment you can give a cyborg. Note that this modification must be fitted in order for the cyborg to support any other mods.

Arms 1: With the tungsten tendons and steel bones of cybernetic arms, your Agents will experience an immediate improvement in accuracy when shooting, and a subsequent saving in ammunition. The operational lifespan of an Agent equipped with these arms is also lengthened by the characteristic health boost which accompanies cybernetic enhancement.

Legs 1: Constructed of a lightweight plated core with wet-grown organic outer coating, these artificial legs provide immediate improvement to both an Agent's health and top speed. Stamina is also improved, thereby increasing the range an Agent fitted with these legs can cover at maximum speed.

Brain 1: It's the ability to make decisions independently of Executive control that differentiates a decisive Agent from a dead Agent. As the Agent is now twice as clever, he's half as likely to get killed. This unit contains diamond processors in a 3D matrix integrated with the cyborg's conventional cognitive biomass. It increases basic perceptions and contains trauma management software to improve the cyborg's ability to withstand otherwise critical damage.

Later versions of these implants will become available as research mitigates, as will wholly new Agent modifications.
