Category: Evaluating and Integrating Data

Read the following passage and answer the question.

Every time I visit the bookstore, I find a new science fiction title about post-apocalyptic survivors taking refuge in New York City's subway tunnels. Some of these survival stories are fun to read, but they have a pesky plausibility problem: if society collapses, those subway tunnels won't be there anymore—at least not for long. On a typical day in a functioning New York City, a crew of engineers works around the clock to pump about 13 million gallons of water out of the subway system, and a major rain event pushes that number up fast. What happens if you take the engineers—and the electricity to work the sump pumps—out of the equation? The first big storm will flood those tunnels, probably for good. At that point, any survivors left underground will have to grow gills or head for the surface.

Which of the following is the best title for this passage?

- ☐ A Visit to a Bookstore
- ☐ The Science of Growing Gills
- ☐ A Refuge in Fiction, But Not in Fact
- ☐ The Best Science Fiction of the Year
